

REPORT TO THE PLANNING COMMISSION

AGENDA ITEM NO. VIII-B COMMISSION MEETING 4/20/11

DEPARTMENT DIRECTOR

April 20, 2011

APPROVED BY

FROM:

KEVIN FABINO, Planning Manage

Development Services Division

THROUGH: MIKE SANCHEZ, Planning Manager

Development Services Division

BY:

ISRAEL TREJO, Planner

Development Services Division

SUBJECT: CONSIDERATION OF CONDITIONAL USE PERMIT APPLICATION NO. C-08-292,

MAJOR REVISION TO VESTING TENTATIVE TRACT MAP NO. 5205/UGM AND

RELATED ENVIRONMENTAL ASSESSMENT NO. T-5205/C-08-292

RECOMMENDATION

Staff recommends that the Planning Commission take the following actions:

- 1. APPROVE the Finding of Conformity to the 2025 Fresno General Plan Master Environmental Impact Report (MEIR) No. 10130 and Mitigated Negative Declaration prepared for Plan Amendment A-09-02 (Air Quality MND) prepared for Environmental Assessment No. T-5205/C-08-292 dated March 18, 2011.
- 2. APPROVE Conditional Use Permit Application No. C-08-292 subject to compliance with the Conditions of Approval dated April 20, 2011.
- 3. APPROVE the Major Revision to Vesting Tentative Tract Map No. 5205/UGM subject to compliance with the Conditions of Approval dated April 20, 2011.

EXECUTIVE SUMMARY

Gary G. Giannetta, on behalf of Gary McDonald Homes, has filed Conditional Use Permit Application No. C-08-292 and Major Revision to Vesting Tentative Tract Map No. 5205/UGM pertaining to approximately 13.07 acres of property located between North Friant Road and East Copper Avenue, within the Copper River Ranch Master Planned Community. Major Revision to Vesting Tentative Tract Map No. 5205/UGM proposes to subdivide the subject property into a 21-lot single family residential planned development subdivision with two outlots. Conditional Use Permit Application No. C-08-292 is a request to establish a Planned Development, which proposes to establish a gated community with private gated streets and modified property development standards, including setback requirements.

The subject property was previously approved for subdivision and development as Village "F" (see Exhibit C) of Vesting Tentative Tract Map No. 5205/UGM, comprising 16 single family residential lots. The new proposal, namely, the Major Revision to Vesting Tentative Tract Map No. 5205/UGM now proposes 21 lots, the reconfiguration of the street and lot patterns and the addition of a stub street, which connects the subject property to a property to the east.

The subject property is located within the 2025 Fresno General Plan and the Woodward Park Community Plan, both plans designate the subject site for medium density residential planned land uses (4.99 to 10.37 dwelling units per acre). Major Revision to Vesting Tentative Tract Map No. 5205/UGM

proposes a 21-lot single family residential planned development subdivision on approximately 13.07 acres at a density of 1.60 dwelling units per acre. The Copper River Ranch Master Planned Community was approved with blended densities that involved both single and multiple family residential development with an overall residential unit restriction of 2,837 units. The submitted subdivision design can be found consistent with the medium density residential planned land use designation, pursuant to the 2025 Fresno General Plan and the Copper River Ranch Master Planned Community design as provided by Tentative Tract Map No. 5205/UGM and Conditional Use Permit No. C-04-153. The subject applications are consistent with the planned land uses and zoning approved for the project site and will implement goals, objectives, and policies of the 2025 Fresno General Plan and the Woodward Park Community Plan.

PROJECT INFORMATION

PROJECT A 21-lot, gated single family residential subdivision to be developed

at a density of 1.60 dwelling units per acre. Outlot A is proposed to be developed with private streets while Outlot B is proposed open

space

APPLICANT Gary G. Giannetta on behalf of Gary McDonald Homes

Located between North Friant Road and East Copper Avenue, within LOCATION

the Copper River Ranch Master Planned Community

(Council District 6, Councilmember Brand)

SITE SIZE Approximately 13.07 acres

LAND USE Existing -Vacant

> Proposed -Single family residential

ZONING Existing -R-1/UGM/cz (Single Family Residential District/Urban

Growth Management/conditions of zoning)

Proposed-No change

PLAN DESIGNATION The proposed 21-lot single family residential subdivision is consistent AND CONSISTENCY

with the 2025 Fresno General Plan and Woodward Park Community Plan designation of the site for medium density residential planned

land uses

ENVIRONMENTAL Finding of Conformity to the 2025 Fresno General Plan Master Environmental Impact Report (MEIR) No. 10130 and Mitigated FINDING

Negative Declaration No. A-09-02 dated March 18, 2011

PLAN COMMITTEE Northeast Area Plan and Implementation Committee recommended approval of the original version of Vesting Tentative RECOMMENDATION

Tract Map No. 5205/UGM at its meeting on October 11, 2004

STAFF Approve the vesting tentative tract map (major revision) and RECOMMENDATION conditional use permit application subject to compliance with the

Conditions of Approval for T-5205/UGM and for C-08-292 dated April

20, 2011

BORDERING PROPERTY INFORMATION

	Planned Land Use	Existing Zoning	Existing Land Use
North	Open Space – Golf Course	O/UGM Open Space/Urban Growth Management	Golf Course
South	Community Commercial	C-2/UGM Community Shopping Center/Urban Growth Management	Commercial
East	Low Density and Medium Low Density Residential	R-1/UGM (pre-zoned) Single Family Residential District/Urban Growth Management	Rural Residential
West	Open Space – Golf Course	O/UGM Open Space/Urban Growth Management	Golf Course

ENVIRONMENTAL FINDING

Development and Resource Management Department staff have prepared an initial study and environmental checklist and evaluated the proposed development in accordance with the land use and environmental policies and provisions of the 2025 Fresno General Plan, the related Master Environmental Impact Report (MEIR) No. 10130 (SCH # 2001071097), and Mitigated Negative Declaration (MND) No. A-09-02 (SCH # 2009051016). The subject property has been proposed to be developed at an intensity and scale that is permitted by the Medium Density Residential (4.99-10.37 dwelling units/acre) planned land use designation and R-1/UGM/cz (Single Family Residential/Urban Growth Management/conditions of zoning) zone district classification for the subject site. Thus, the subdivision of the subject property in accordance with the Major Revision to Vesting Tentative Tract Map No. 5205/UGM will not facilitate an additional intensification of uses beyond that which already exists or would be allowed by the above-noted planned land use designation. Moreover, it is not expected that the future development will adversely impact existing city service systems or the traffic circulation system that serves the subject property. These infrastructure findings have been verified by the Public Works and Public Utilities Departments. If has been further determined that all applicable mitigation measures of MEIR No. 10130 and MND No. A-09-02 have been applied to the project necessary to assure that the project will not cause significant adverse cumulative impacts, growth inducing impacts, and irreversible significant effects beyond those identified by MEIR No. 10130 and MND No. A-09-02 as provided by CEQA Section 15177(b)(3).

Pursuant to Section 21157.1 of the California Public Resources Code (California Environmental Quality Act), it may be determined that a subsequent project, as identified in the MEIR pursuant to Section 21157(b)(2) of the Public Resources Code and CEQA Guidelines Section 15177, falls within the scope of a MEIR, provided that the project does not cause significant impacts on the environment that were not previously examined by the MEIR. Relative to the specific project proposal, the environmental impacts noted in the MEIR, pursuant to the 2025 Fresno General Plan land use designation, include impacts associated with the Medium Density Residential planned land use designation specified for the subject property. Based on the initial study prepared, the following findings are made: (1) The proposed project was identified as a Subsequent Project in MEIR No. 10130 because its land use designation and permissible densities and intensities are set forth in Figure I-1 of MEIR No. 10130; (2) The proposed project will not generate additional significant effects not previously identified and analyzed by the MEIR or MND No. A-09-02 (as indicated on the attached Environmental Assessment Checklist) for the reasons

discussed within the environmental assessment for the subject project; and, (3) No new additional mitigation measures are required because the proposed project will not generate additional significant effects not previously identified and analyzed by the MEIR or MND.

Therefore, the project proposal has been determined to be within the scope of the MEIR and MND as defined by Section 15177 of the CEQA Guidelines and staff has properly published a Finding of Conformity to MEIR No. 10130 dated March 18, 2011, with no comments received to date. In addition, after conducting a review of the adequacy of the MEIR pursuant to Public Resources Code Section 21157.6(b)(1), the Planning and Development Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the MND adopted; and, that no new information, which was not know and could not have been known at the time that the MEIR was certified as complete or the MND was adopted, has become available.

BACKGROUND / ANALYSIS

Gary G. Giannetta, on behalf of Gary McDonald Homes, has filed Conditional Use Permit Application No. C-08-292 and Major Revision to Vesting Tentative Tract Map No. 5205/UGM pertaining to approximately 13.07 acres of property located between North Friant Road and East Copper Avenue, within the Copper River Ranch Master Planned Community. Major Revision to Vesting Tentative Tract Map No. 5205/UGM proposes to subdivide the subject property into a 21-lot single family residential planned development subdivision with two outlots. Conditional Use Permit Application No. C-08-292 is a request to establish a Planned Development, which proposes to establish a gated community with private gated streets and modified property development standards, including setback requirements.

The subject property is located within the 2025 Fresno General Plan and the Woodward Park Community Plan, both plans designate the subject site for medium density residential planned land uses (4.99 to 10.37 dwelling units per acre). Major Revision to Vesting Tentative Tract Map No. 5205/UGM proposes a 21-lot single family residential planned development subdivision on approximately 13.07 acres at a density of 1.60 dwelling units per acre. The Copper River Ranch Master Planned Community was approved with blended densities that involved both single and multiple family residential development with an overall residential unit restriction of 2,837 units. The submitted subdivision design can be found consistent with the medium density residential planned land use designation, pursuant to the 2025 Fresno General Plan and the Copper River Ranch Master Planned Community design as provided by Tentative Tract Map No. 5205/UGM and Conditional Use Permit No. C-04-153. The subject applications are consistent with the planned land uses and zoning approved for the project site and will implement goals, objectives, and policies of the 2025 Fresno General Plan and the Woodward Park Community Plan.

The Copper River Ranch Master Planned Community was approved under Vesting Tentative Tract Map No. 5205/UGM and Conditional Use Permit Application No. C-04-153, approved on November 3, 2004. These development applications identified the subdivision of approximately 574 acres into an 830-lot single family residential subdivision that includes 8 single family residential villages consisting of both conventional lots and planned development lots with 45 outlots for multiple family residential development, landscaped open space, and commercial development. The overall Copper River Ranch project is planned for development in phases. The Major Revision to Vesting Tentative Tract Map No. 5205/UGM and Conditional Use Permit Application No. C-08-292 implement the development and design concepts of the Copper River Ranch Master Planned Community.

The subject property was previously approved for subdivision and development as Village "F" (see Exhibit C) of Vesting Tentative Tract Map No. 5205/UGM, comprising 16 single family residential lots. The new proposal, namely, the Major Revision to Vesting Tentative Tract Map No. 5205/UGM now

proposes 21 lots, the reconfiguration of the street and lot patterns and the addition of a stub street, which connects the subject property to a property to the east.

Major Revision to Vesting Tentative Tract Map No. 5205

Pursuant to section 12-1005.2(a)(4) of the Fresno Municipal Code (FMC), a one-time increase in the number of lots contained in an approved subdivision is considered a minor revision. The one-time increase in the number of lots for Vesting Tentative Tract Map No. 5205/UGM has been previously utilized.

Pursuant to section 12-1005.2(c) of the FMC, a major revision is a revision that does not fit within the description of a minor revision. The final map for Vesting Tentative Tract Map No. 5205/UGM contained 16 lots within the subject area; the subject applications propose a five lot increase from the original vesting tentative tract map (from 16 lots to 21 lots). Additional alterations include a change in the street pattern and the addition of a stub street, which connects the subject property to a property to the east, located at the northeast area of the site.

Density Transfer

Density transfers are permitted through the processing of a planned development conditional use permit pursuant to Section 12-304-B-23 of the FMC. There are approximately 41 acres of land planned medium density and 171 acres of land planned medium-low density residential within Villages A through H of the Copper River Ranch project. The low end of the allowed "blended" density is approximately 578 lots. The high end of the allowed "blended" density is approximately 1281 lots. Villages A through H (Villages G and H have not been developed yet) are scheduled to develop with 947 lots, which meets the density transfer requirements.

Conditional Use Permit Application (CUP)

In addition to submitting a vesting tentative tract map (major revision), the applicant has submitted Conditional Use Permit Application No. C-08-292. Pursuant to Section 12-306-N-21 of the Fresno Municipal Code (FMC), a CUP is required in order to create a planned development. As part of the CUP, an applicant may request a modification of development standards, including lot size, setbacks and yard areas. Conditional Use Permit Application No. C-08-292 is a request to establish a Planned Development, which proposes to establish a gated community with private streets and modified property development standards, including setback requirements. The applicant is proposing a 15 foot rear yard. The standard yard within the R-1 (Single Family Residential District) zone district is 20 feet. There is an existing decorative vehicular gate near the entrance to the proposed custom lot subdivision. The applicant is also proposing an outlot for open space purposes.

Sidewalks, Streets and Access Points

On December 09, 2010, the City Council approved Resolution No. 2010-279 authorizing specific "pending" applications for planned unit developments designed without sidewalks on both sides of private residential streets to proceed with the entitlement process subject to: (1) The entitlement application must have been received by the City of Fresno and deemed "complete" as defined by the Fresno Municipal Code prior to December 09, 2010; (2) The development applications must be for "vesting" entitlements; and, (3) The applicant must enter into an agreement to defend, hold harmless and indemnify the City of Fresno. This Resolution acknowledged five development entitlement applications for approximately 370 total single family residential units currently pending; including the Major Revision to Vesting Tentative Tract Map No. 5205/UGM.

The Public Works Department, Traffic Engineering Division has reviewed the proposed project and potential traffic related impacts for the proposed applications and has determined that the streets adjacent to and near the subject site will be able to accommodate the quantity and kind of traffic which may be potentially generated subject to the requirements stipulated within the memoranda from the Traffic Engineering Division dated June 9, 2009. These requirements generally include: (1) The provision of a minimum two points of vehicular access to major streets for any phase of the development; (2) Street improvements, (including, but not limited to, construction of concrete curbs, gutters, pavement, underground street lighting systems; and, (3) Payment of applicable impact fees (including, but not limited to, the Traffic Signal Mitigation Impact (TSMI) Fee, Fresno Major Street Impact (FMSI) Fee, and Copper River Ranch Associated major Roadway Infrastructure and Interior Collector Roadway Facility Fees.

The private street within the subject property will provide access to the recently approved Vesting Tentative Tract Map No. 5903/UGM; said subdivision contains 6 lots.

Public Services

The Department of Public Utilities (DPU) has determined that adequate sanitary sewer and water services are available to serve the project site. The DPU has identified sanitary sewer and water requirements for this project which are listed in the memorandums dated, respectively, June 10, 2009 and May 27, 2009.

The City of Fresno Fire Department has submitted comments indicating the proposed project is located within one mile from Fresno Fire Station No. 17. Development of lots 16 through 21 is contingent upon the completion of the second access path to the east through Vesting Tentative Tract Map No. 5903/UGM; said map proposes a 20 foot emergency vehicle access through its boundaries.

Fresno Metropolitan Flood Control District (FMFCD)

The Fresno Metropolitan Flood Control District (FMFCD) has indicated that drainage service is available for the development. The natural drainage of land in this immediate area flows from east to west. The proposed development must accommodate for the natural drainage pattern to continue or have adequate mitigation in place to prevent future drainage issues with flooding of the properties to the east of the subject site. In order to provide surface drainage and major storm conveyance from the properties to the east (APNs 579-074-30 and 579-074-33), the FMFCD recommends a stub street to the east between proposed lots 9 and 10. If the stub street is not constructed, then the developer of the subject application shall provide for surface drainage of storm water in the form of an improved channel.

The property to the east of the subject site is located within the boundaries of the County of Fresno. Staff contacted the grading engineer of the County of Fresno to obtain comments/requirements for the subject project. The County grading engineer indicated that the FMFCD's requirements (i.e. stub street or improved channel) should be sufficient to prevent future drainage issues with flooding of the properties to the east. Any grading necessary on the parcels to the east, to redirect drainage to the stub street (or other alternative), will require a grading permit from the County of Fresno.

State Department of Transportation (Caltrans)

Caltrans, in their letter dated June 8, 2009, has no comment on the proposed project.

Notice of Planning Commission Hearing

The Development and Resource Management Department mailed notices of this Planning Commission hearing to all surrounding property owners within 350 feet of the subject property, pursuant to Section 12-401-C-2 of the Fresno Municipal Code.

Conditional Use Permit Application Findings (Planned Development)

Conditional Use Permit Application No. C-08-292 proposes the development of a 21 lot single family residential planned development. The planned development will provide a gated community with private streets and reduced rear yard setbacks. Based upon analysis of the conditional use permit application and subject to the applicant's compliance with the Conditions of Approval dated April 20, 2011, staff concludes that the following required findings of Section 12-405-A-2 of the Fresno Municipal Code can be made.

- 1. All applicable provisions of this Code are complied with and the site of the proposed use is adequate in size and shape to accommodate said use, and accommodate all yards, spaces, walls and fences, parking, loading, recycling areas, landscaping, and other required features; and,
 - Conditional Use Permit Application No. C-08-292 will comply with all applicable codes, including, landscaping, walls, etc., given that the special conditions of project approval will ensure that all conditions are met.
- 2. The site for the proposed use relates to streets and highways adequate in width and pavement type to carry the quantity and kind of traffic generated by the proposed use; and,
 - The Public Works, Traffic Engineering Division reviewed the proposed project and assessed the adjacent streets to ensure that the proposal would not have significant impacts on traffic and the surrounding community.
- 3. The proposed use will not be detrimental to the public welfare or injurious to property or improvements in the area in which the property is located. The third finding shall not apply to uses which are subject to the provision of Section 12-306-N-30 of the FMC.

The site is vacant and with the adoption of the 2025 Fresno General Plan, the city analyzed the impacts of converting vacant land into urban uses and determined that it is necessary to convert land within the sphere of influence in an attempt to provide housing, growth, employment opportunities, etc. The Development and Resource Management Department has determined that the proposed use will not be detrimental to the public welfare or be injurious to property or improvements in the area in which the property is located if developed in accordance with the various conditions/requirements established through the related vesting tentative tract map application review and conditional use permit application review processes.

Vesting Tentative Tract Map Findings

The Subdivision Map Act (California Government Code §§ 66400, et seq.) requires that a proposed subdivision not be approved unless the map, together with its design and improvements, is found to be consistent with the General Plan and any applicable specific plan (Finding No. 1 below).

State law further provides that the proposed subdivision map be denied if any one of the Finding Nos. 2 - 5 below is made in the negative. In addition, State law requires that a subdivision be found to provide for

future passive and natural heating or cooling opportunities in the subdivision development (Finding No. 6 below).

- 1. The proposed subdivision map, together with its design and improvements, is consistent with the City's 2025 General Plan and the Woodward Park Community Plan, because the plans designate the site for medium density residential planned land uses and the project design meets the density and zoning ordinance criteria for development.
- 2. This site is physically suitable for the proposed type and density of development, because conditions of approval will ensure adequate access and drainage on and off the site; and, that development shall occur in accordance with adopted standards, goals, objectives, and policies for development in the City of Fresno.
- 3. The proposed subdivision design and improvement is not likely to cause substantial and considerable damage to the natural environment, including fish, wildlife or their habitat, because the area is not known to contain any unique or endangered species and the urbanized nature of the area in which the site is located.
- 4. The proposed subdivision design and improvements are not likely to cause serious public health and safety problems, because the conditions of approval have shown and will insure that the subdivision conforms with city health and safety standards.
- 5. The proposed subdivision design will not conflict with public easements within or through the site, because conditions of approval will assure noninterference with any existing or proposed public easements.
- 6. The design of the subdivision provides, to the extent feasible, for future passive and natural heating or cooling opportunities in the subdivision, because of the appropriate use and placement of landscaping plant materials and because of the orientation of the proposed lots.

The subdivision map, based on the required findings for approval and subject to the recommended conditions of approval, and the standards and policies of the 2025 Fresno General Plan and Woodward Park Community Plan, complies with applicable zoning and subdivision requirements. Based upon the plans and information submitted by the applicant and the recommended conditions of project approval, staff has determined that these findings can be made.

Planning Commission action of the proposed Vesting Tentative Tract Map and Conditional Use Permit, unless appealed to the Council, is final.

CONCLUSION / RECOMMENDATION

The appropriateness of the proposed project has been examined with respect to its consistency with goals and policies of the 2025 Fresno General Plan and the Woodward Park Community Plan; its compatibility with surrounding existing or proposed uses; and its avoidance or mitigation of potentially significant adverse environmental impacts. These factors have been evaluated as described above and by the accompanying environmental assessment. Upon consideration of this evaluation, it can be concluded that the Major Revision to Vesting Tentative Tract Map No. 5205/UGM and Conditional Use Permit No. C-08-292 are appropriate for the project site.

PROJECT DESCRIPTION AND LOCATION:

Vesting Tentative Tract Map No. 5205/UGM, a 20-lot single-family residential private street planned development project with 2 outlots on approximately 13 acres of R-1/UGM zone property located within the Copper River Ranch Planned Community. This map has been submitted as a major amendment to the previously approved T-5205/UGM. Conditional Use Permit Application No. C-08-292 is requesting a planned development with gated entry, private street and reduced setbacks

CITY OF FRESNO DEVELOPMENT AND RESOURCE MANAGEMENT DEPARTMENT

CONDITIONS OF APPROVAL

APRIL 20, 2011

VESTING TENTATIVE TRACT MAP NO. 5205/UGM (Major Revision)

East side of North Knotting Hill Drive, north of East Copper Avenue

All vesting tentative maps are subject to the applicable provisions of the State Subdivision Map Act, Fresno Municipal Code, City policies, and City of Fresno Standard Specifications. The following specific conditions are applicable to this vesting tentative tract map.

NOTICE TO PROJECT APPLICANT

In accordance with the provisions of Government Code §66020(d)(1), the imposition of fees, dedications, reservations or exactions for this project are subject to protest by the project applicant at the time of approval or conditional approval of the development or within 90 days after the date of the imposition of the fees, dedications, reservations or exactions imposed on the development project.

URBAN GROWTH MANAGEMENT REQUIREMENTS (GENERAL)

The subdivider of property located within the UGM boundaries shall comply with all sewer, water and street requirements and pay all applicable UGM fees imposed under the Urban Growth Management process (with appropriate credit given for the installation of required UGM improvements) in accordance with the requirements of State Law as related to tentative tract maps.

GENERAL CONDITIONS

- 1. Upon conditional approval of Vesting Tentative Tract Map No. 5205/UGM (major revision), a Planned Development dated March 11, 2011, the subdivider may prepare a Final Map in accordance with the approved vesting tentative map and Conditional Use Permit No. C-08-292.
- 2. The Conditions of Approval for Vesting Tentative Tract Map No. 5205/UGM, dated November 3, 2004, remain in effect for the subject project except as modified by the subject conditions of approval.
- An Air Impact Assessment (AIA) application for the proposed project shall have been submitted to the San Joaquin Valley Air Pollution Control District prior to the submittal/acceptance of any phase of the Final Map for recordation/processing.
- 4. Submit grading plans and a soils report to the City of Fresno Planning and Development Department for verification prior to Final Map approval (Reference: Sections 12-1022 and 12-1023 of the Fresno Municipal Code). Grading plans shall indicate the location of

any required walls and indicate the proposed width of required landscape easements or strips. Approval of the grading plan is required prior to Final Map approval.

- 5. At the time of Final Map submittal, the subdivider shall submit engineered construction plans to the City of Fresno Public Works, Public Utilities, and Planning and Development Departments for grading, public sanitary sewer system, public water system, street lighting system, public streets, and storm drainage, including other technical reports and engineered plans as necessary to construct the required public improvements and work and applicable processing fees.
- 6. Engineered construction plans shall be approved by the City prior to the approval of the Final Map. If, at the time of Final Map approval, such plans have not been approved, the subdivider shall provide performance security in an amount established by the City to guarantee the completion of plans.
- 7. Public utilities easements, as necessary, shall be shown on the Final Map and dedicated to the City of Fresno. Public utility easements beyond the limits of the Final Map, but required as a condition of development, shall be acquired at the subdivider's cost and shall be dedicated by separate instrument at the time of Final Map approval. The relocation of existing utilities necessitated by the required public improvements shall be paid for by the subdivider. The subdivider is responsible to contact the appropriate utility company for information.
- 8. Comply with the conditions, policies and standards set forth in the City of Fresno, Municipal Code, Article 10, Chapter 12, "Subdivision of Real Property;" Resolution No. 68-187, "City Policy with Respect to Subdivisions;" and City of Fresno Standard Specifications, 2002 Edition, and any amendments thereto.
- 9. The subdivider shall pay applicable fees for, but not limited to, plan checks for street improvements and other grading and construction; street trees, street signs, water and sewer service, and inspections in accordance with the City of Fresno Master Fee Schedule (City Resolution No. 79-606 and No. 80-420) and any amendments, modifications, or additions thereto; and in accordance with the requirements of State law as related to vesting tentative maps.
- 10. As a condition of Final Map approval, the subdivider shall furnish to the City a subdivision guarantee listing all parties having any right, title or interest and the nature of their interest per State law.
- 11. It shall be required that you file an amended Exhibit Seven titled "Land Use, Density and Parcel Identification Matrix" for Conditional Use Permit No. C-04-153.
- 12. Major Revision to Vesting Tentative Tract Map No. 5205/UGM is subject to approval of related Conditional Use Permit No. C-08-292.

GENERAL INFORMATION

13. Contact the United States Postal Service for the location and type of mailboxes to be installed in this subdivision.

- a) It is recommended that at least 6 months prior to the first occupancy, the Developer shall contact the local United States Postal Service representative to complete a Mode of Delivery Agreement for New Construction. The Mode of Delivery Agreement must have a District approval signature to be valid. In addition to completing the Agreement, the Developer shall provide a final map (with address details) to the local USPS representative. The Developer shall, at their own expense, procure, construct and install all mail receptacle facilities for each location as specified and approved by the USPS.
- 14. Pursuant to Section 66456.1 of the Subdivision Map Act, which states "The right of the subdivider to file multiple Final Maps shall not limit the authority of the local agency to impose reasonable conditions relating to the filing of multiple Final Maps," multiple final maps filed by the subdivider on this tract shall fully and independently conform to all provisions of Fresno Municipal Code Chapter 12, Article 10, Subdivision of Real Property.
- 15. The developer/owner shall obtain any and all permits required for the removal or demolition of any existing building or structure located within the subdivision boundaries. The developer/owner shall also obtain any and all permits required for the proper abandonment/closure of any existing water well, septic tank/leach field or cesspool, and irrigation pipeline on the subject property. All such permits shall be obtained prior to commencement of tract grading work, in accordance with Chapter 13 of the Fresno Municipal Code.
- 16. The subdivider shall comply with Regulation VIII of the San Joaquin Valley Air Pollution Control District for the control of particulate matter and fugitive dust during construction of this project.
- 17. The developer shall comply with Rule 8060 of the San Joaquin Valley Air Pollution Control District for the control of fugitive dust requirements from paved and unpaved roads.
- 18. If archaeological and/or animal fossil material is encountered during project surveying, grading, excavating, or construction, work shall stop immediately.
- 19. If there are suspected human remains, the Fresno County Coroner shall be immediately contacted (business hours: (559) 268-0109; after hours the contact phone number is (559) 488-3111 for the Fresno County Sheriff's Department). If remains or other archaeological material is possibly Native American in origin, the Native American Heritage Commission (phone number (916) 653-4082) shall be immediately contacted, and the California Archaeological Inventory/Southern San Joaquin Valley Information Center (phone number (805) 644-2289) shall be contacted to obtain a referral list of recognized archaeologists.
- 20. If animal fossils are uncovered, the Museum of Paleontology at the University of California, Berkeley shall be contacted to obtain a referral list of recognized paleontologists. An assessment shall be conducted by a paleontologist; if the paleontologist determines the material to be significant, a recommendation shall be made to the City as to any further site investigation or preservation measures.

21. Apportionment of Special Assessment: If, as part of this subdivision, a division will be made of any lot or parcel of land upon which there is an unpaid special assessment levied under any State or local law, including a division into condominium interest as defined in Section 783 of the Civil Code, the developer/owner shall file a written application with the City of Fresno Director of Public Works, requesting apportionment of the unpaid portion of the assessment or pay off such assessment in full.

If the subdivider elects to apportion the assessment, the application shall contain the following information:

- a) A full description of each assessed lot, parcel or interest to be divided and of how such lot, parcel or interest will be divided;
- b) A request that the Engineer apportion the amount remaining unpaid on the assessment in accordance with applicable law; and
- c) Written consent of the owner(s) of each such lot, parcel, or interest to the requested apportionment.
- d) The application shall be filed prior to the approval of the Final Map(s) by the City and shall be accompanied by a fee in an amount specified in the Master Fee Resolution for each separate lot, parcel, or interest into which the original assessed lot, parcel or interest is to be divided. The fee shall be in an amount sufficient to pay all costs of the City and the Engineer of Work responsible for determining the initial assessment in making the requested apportionment.

Lot Dimensions

22. Lot dimensions shall match those depicted on "Exhibit A," dated March 11, 2011, for Major Revision to Vesting Tentative Tract Map No. 5205/UGM.

Building Setbacks

23. Building setbacks shall be in accordance with the site plan exhibit "A" dated March 11, 2011, and as follows:

Front yard: Front yard setbacks shall be a minimum of 20 feet.

Interior Side yard: Interior side yard setbacks shall be a minimum of five feet.

Proposed lots 13 and 21 are reversed corner lots. The side yard abutting the street shall not be less than 10 feet.

Rear yard: Rear yard setbacks shall be a minimum 15 feet.

a) Should a drainage channel be proposed between lots 9 and 10 (or other location), the appropriate building setback shall be provided as determined by the Fresno Metropolitan Flood Control District and the Development and Resource Management Department.

Lot Coverage

24. Pursuant to the requirements from the Fresno Metropolitan Flood Control District, the developed lot coverage shall be 40% or less, otherwise the applicant shall be required to mitigate the impacts of the increased runoff due to the increased lot coverage to a rate that would be expected if developed to 40% lot coverage. Additionally, the applicant shall indicate on Exhibit A the amount of lot coverage proposed.

Landscaping and Walls

- 25. Comply with the memorandum from the Public Works Department dated May 26, 2009.
- 26. There were no walls depicted on Site Plan Exhibit A dated March 11, 2011. Any walls or fences proposed along the eastern edge of the subject tract shall be approved by the Development and Resource Management Department, including, the Building and Safety Services Division (which will review drainage issues).

STREETS AND RIGHTS-OF-WAY

- 27. Comply with all of the requirements within the attached Public Works Department, Traffic and Engineering Division memorandum dated June 9, 2009 with the following exception:
 - a) In accordance with City Council Resolution No. 2010-279, the proposed project is exempt from providing sidewalks on both sides of private streets subject to the execution of an indemnification agreement, in a form provided by the City of Fresno, prior to Planning Commission action respective to the proposed project.
- 28. In accordance with Section 12-1011(f)(6) of the Fresno Municipal Code every lot shall abut on a public street right-of-way, except where adequate internal circulation is provided by a private street or streets in an approved planned unit development.
 - a) A cross access agreement with Vesting Tentative Tract Map No. 5903/UGM is required in order to provide access to a public street right-of-way for Vesting Tentative Tract Map No. 5903/UGM.

SANITARY SEWER SERVICE

29. Comply with the memorandum from the Public Utilities Department dated June 10, 2009.

WATER SERVICE

30. Comply with the memorandum from the Public Utilities Department, Water Division dated May 27, 2009.

STREET NAMES

31. Comply with the street name review memorandum dated May 21, 2009.

SOLID WASTE SERVICE

32. Comply with the memorandum from the Department of Public Utilities dated June 9, 2009.

FIRE SERVICE

33. Comply with the memorandum from the Fire Department dated March 2, 2011.

FLOOD CONTROL AND DRAINAGE

- 34. The subdivider shall be required to comply with the specific requirements imposed by the Fresno Metropolitan Flood Control District (FMFCD). These requirements are identified in the District's letters to the Planning and Development Department dated June 2, 2009.
- 35. Should there be cross drainage with the subject property and the properties to the east (APNs 579-074-33 and 579-074-30), a cross drainage covenant will be required between the affected parcels.

COUNTY OF FRESNO-ENVIRONMENTAL HEALTH

36. The County of Fresno, Environmental Health Division, indicated they have no comments.

RIGHT-OF-WAY ACQUISITION

- 38. The developer will be responsible for the acquisition of any necessary right-of-way to construct any of the required improvements.
- 39. Rights-of-way acquisition shall include any rights-of-way necessary for proper drainage, signing, pole relocation, and shoulder grading. The exact requirement must be determined at the project design stage based on the existing conditions and detailed design information.
- 40. In the event an acquisition of any easement or right-of-way is necessitated by the subject development, said acquisition will be accomplished prior to Final Map approval. The developer/owner should contact the Real Estate Section of the Public Works Department to receive procedural guidance in such acquisitions.
- 41. Should such acquisition not be accomplished by the subdivider prior to Final Map approval, the subdivider must request and grant to the City the full authority to attempt acquisition either through negotiation or through its power of eminent domain. The subdivider shall furnish to the City Public Works Department, Engineering Division/ Real Estate Section, an appraisal report or a request for an estimated appraisal amount (to be determined by the City of Fresno Real Estate Section) prior to preparation of a Subdivision Agreement.
- 42. The subdivider shall submit adequate security in the form of a cash deposit to guarantee payment of all costs associated with the acquisition, including staff time, attorney's fees,

appraisal fees, court costs, and all related expenditures and costs necessary to effect the acquisition of such easements or rights-of-way.

MAINTENANCE OBLIGATIONS

- 43. The long term maintenance of all the items listed below is the ultimate responsibility of the owner/developer.
 - a) The property owner shall be responsible for providing for the maintenance of all landscaping and hardscaping located within proposed Outlots associated with the proposed project.
 - b) The property owner shall be responsible for providing for the maintenance of all landscaping and hardscaping located in any entry median island or traffic medians located within the project.
 - c) The property owner shall be responsible for providing for the maintenance of the curbs and gutters, valley gutter, sidewalks, street lights and street signage within any local public street rights-of-way associated with the project.
 - d) The property owner shall be responsible for providing for the maintenance of all street trees within any local public street rights-of-way associated with the project.
- 44. If the owner/developer chooses to be annexed into the City's CFD for maintenance purposes, then an Annexation Request Package shall be submitted to the Public Works Department for review and processing.
- 45. Proceedings to place the Final Map into a CFD shall not commence until the Final Map has been annexed into the City of Fresno and the Final Map, Landscape and Street Construction Plans are considered to be technically correct.
- 46. If the developer/subdivider elects to petition for annexation into the City's Community Facilities District, he/she shall be required to provide the City of Fresno, Department of Public Works, with copies of signed acknowledgments from each purchaser of a lot within the subdivision, attesting to the purchasers understanding that the lot will have an annual maintenance assessment and that he/she is aware of the estimated amount of the assessment. The developer/subdivider shall execute and record a covenant on each lot providing notice that the subject property is subject to annual payment of the Community Facilities District assessment.
- 47. Should the City Council or owner/developer choose not to include all of the maintenance items or certain items listed above in a CFD, then the property owner/developer shall be responsible for establishing a Home Owners' Association (HOA) or other property based management mechanism which provides for the maintenance of these items in a manner which provides appropriate security and is deemed acceptable to both the City of Fresno Development and Resource Management and Public Works Departments.

STREETS AND RIGHTS-OF-WAY

- 48. The subdivider shall furnish to the City acceptable security to guarantee the construction of the off-site street improvements in accordance with all applicable provisions of the FMC and the State Subdivision Map Act.
- 49. All of the required street improvements shall be constructed and/or installed in accordance with the City of Fresno Standard Specifications (2002 Edition). The following shall be submitted as a single package to the Public Works Department for review and approval:
 - a. Signing and striping plans (per current California Department of Transportation standards);
 - b. Street Construction Plans:
 - c. Landscape and irrigation plans (median island and street trees within all parkways); and
- 50. The subdivider shall underground all existing off-site overhead utilities and proposed utility systems in accordance with FMC Sections 12-1011 and Resolution No. 78-522, 88-229.
- 51. The subdivider shall construct an underground street lighting system per Public Works Standards within the limits of the tract. Spacing and design shall conform to Public Works Standards for arterial and local streets. Height, type, spacing, etc., of standards and luminaries shall be in accordance with Resolution No. 68-187, 78-522, 81-219, and 88-229 or any modification thereto approved by the City Traffic Engineer prior to Final Map approval. Upon completion of the work by the subdivider and acceptance of the work by the City, the street lighting system shall be dedicated to the City. Submit engineered construction plans to the Public Works Department for approval.

PUBLIC WORKS DEPARTMENT-GENERAL ENGINEERING

52. Depict the existing public utility easement as red-lined on Vesting Tentative Tract Map No. 5205/UGM (major revision).

FRESNO IRRIGATION DISTRICT (FID)

53. Pursuant to the letter dated May 8, 2009, FID does not own, operate or maintain facilities on the subject property.

PACIFIC GAS AND ELECTRIC COMPANY

54. The developer/owner shall comply with the requirements in the letter from the Pacific Gas and Electric (PG&E) Company dated May 27, 2009.

CALTRANS

55. In their letter dated June 8, 2009, Caltrans indicated they have no comment.

COUNTY OF FRESNO-GRADING ENGINEER

56. The proposed development shall accommodate for the natural drainage pattern to continue or have adequate mitigation in place to prevent future drainage issues with flooding of the properties to the east. Any grading necessary on the parcels to the east of the subject site (located within the County of Fresno) to redirect drainage to the stub street (or other alternative) will require a grading permit be issued from the County of Fresno.

DEVELOPMENT FEES AND CHARGES

57. This project is subject to the following fees and charges:

SEWER CONNECTION CHARGES	FEE RATE
h. Lateral Sewer Charge[4]	\$0.10/sq. ft. (to 100' depth)
i. Oversize Charge[4]	\$0.05/sq. ft. (to 100' depth)
j. Trunk Sewer Charge[2] Service Area: Herndon	\$496/living unit
k. Wastewater Facilities Charge[3]	\$2,119/living unit
I. Copper River Ranch Sewer Backbone System [4]	\$613.67/living unit
m. Copper Avenue Sewer Lift Station Charge [4]	\$650/living unit
n. House Branch Sewer Charge [2]	N/A
WATER CONNECTION CHARGES	FEE RATE
o. Service Connection Charge	Fee based on service(s) and meter(s) sizes specified by owner; fee for service(s) and Meter(s) established by the Master Fee Schedule.
p. Frontage Charge[4]	\$6.50/lineal foot
q. Transmission Grid Main Charge[4]	\$643/gross acre (parcels 5 gross acres or more)
r. Transmission Grid Main Bond Debt Service Charge [4]	\$243/gross acre (parcels 5 gross acres or more)
s. UGM Water Supply Fee [2] Service Area: 101s	\$456/living unit

t.	Well Head Treatment Fee [2] Service Area: 101	\$0/living unit
u.	Recharge Fee [2] Service Area: 101	\$0/living unit
٧.	1994 Bond Debt Service [4] Service Area: 101	\$895/living unit
<u>CI</u>	TYWIDE DEVELOPMENT IMPACT FEES	FEE RATE
W.	Fire Facilities Impact Fee – Citywide [4]	\$539/living unit
x.	Park Facility Impact Fee – Citywide [4]	\$2278/living unit
у.	Quimby Parkland Dedication Fee [2]	\$1120/living unit
Z.	Citywide Regional Street Fee [4]	\$8,361/adj. acre
aa	. New Growth Area Major Street Fee [4]	\$18,790/adj. acre
bb	. Police Facilities Impact Fee – Citywide [4]	\$624/living unit
CC.	Traffic Signal Charge [4]	\$440.03/living unit
<u>cc</u>	OPPER RIVER RANCH IMPACT FEES	FEE RATE
dd	. CRR Major Roadway Infrastructure Facility Fee [4]	\$7,293.30/adj. acre
ee	. CRR Major Interior Collector Roadway Facility Fee [4]	\$29,786.01/adj. acre
ff.	CRR Clovis Mitigation Fee [2]	\$38.99/ADT [5]
gg	. CRR Friant Widening Mitigation Fee [2]	\$9.76/ADT [5]

Notes:

On July 22, 2008, the Fresno County Board of Supervisors passed Ordinance No. 2008 – 023 requiring the payment of County Public Impact Facilities Impact Fees. The effective date of this ordinance is September 20, 2008. Contact the County of Fresno, Public Works and Planning Department to determine payment of this fee obligation. Confirmation by the County of Fresno is required before the City of Fresno can issue building permits.

- [1] Deferrable through Fee Deferral Covenant.
- [2] Due at Final Map.
- [3] Due at Building Permit.
- [4] Due at Certificate of Occupancy.
- [5] Determined by Public Works.

5. Planned Land Use:

Medium Density Residential (4.99-10.37 dwelling units/acre)

6. Plan Areas:

2025 Fresno General Plan and Woodward Park Community Plan

7. Project Description:

Requests authorization to establish a gated private street planned development with modified property development standards for 21 lots proposed to be created by Major Revision to Vesting Tentative Tract

Map No. 5205/UGM

PART B - GENERAL CONDITIONS AND REQUIREMENTS

The City of Fresno Planning Commission, on April 20, 2011, approved the special permit application subject to the enclosed list of conditions and Exhibit A for Conditional Use Permit Application No. C-08-292.

IMPORTANT: PLEASE READ CAREFULLY

Please note that this project may be subject to a variety of discretionary conditions of approval. These include conditions based on adopted City plans and policies, those determined through site plan review and environmental assessment essential to mitigate adverse effects on the environment including the health, safety, and welfare of the community, and recommended conditions for development that are not essential to health, safety, and welfare, but would on the whole enhance the project and its relationship to the neighborhood and environment.

Conditions of Approval Conditional Use Permit Application No. C-08-292 April 20, 2011 Page 2 of 7

Discretionary conditions of approval may be appealed. All code requirements, however, are mandatory and may only be modified by variance, provided the findings pursuant to Fresno Municipal Code Section 12-405.A can be made.

Approval of this special permit shall be considered null and void in the event of failure by the applicant and/or the authorized representative, architect, engineer, or designer to disclose and delineate all facts and information relating to the subject property and the proposed development including, but not limited to, the following:

- 1. All existing and proposed improvements including but not limited to buildings and structures, signs and their uses, trees, walls, driveways, outdoor storage, and open land use areas on the subject property and all of the preceding which are located on adjoining property and may encroach on the subject property;
- 2. All public and private easements, rights-of-way and any actual or potential prescriptive easements or uses of the subject property; and,
- 3. Existing and proposed grade differentials between the subject property and adjoining property zoned or planned for residential use.

Approval of this special permit may become null and void in the event that development is not completed in accordance with all the conditions and requirements imposed on this special permit, the Zoning Ordinance, and all Public Works Standards and Specifications. The Development and Resource Management Department shall not assume responsibility for any deletions or omissions resulting from the special permit review process or for additions or alterations to construction plan not specifically submitted and reviewed and approved pursuant to this special permit or subsequent amendments or revisions. (Include this note on the site plan.)

No uses of land, buildings, or structures other than those specifically approved pursuant to this site plan shall be permitted. (Include this note on the site plan.)

Transfer all red line notes, etc., shown on the original site plan exhibit to the final site plan. CORRECTIONS SHALL INCLUDE ALL THOSE LISTED IN THIS DOCUMENT AND THOSE LISTED IN THE CORRECTION LIST PROVIDED BY THE PLAN CHECK PROCESS.

The exercise of rights granted by this special permit must be commenced by April 20, 2015 (four years from the date of approval).

To complete the back-check process for building permit relative to planning and zoning issues, submit copies of this corrected, final site plan, together with copies of the elevations, landscape, and irrigation plans, and any required covenants and/or studies or analyses to the Planning Division for final review and approval, ten days before applying for building permits.

Copies of this final approved site plan, elevations, landscape, and irrigation plans stamped by the Planning Division <u>must be substituted</u> for unstamped copies of the same in each of the sets of construction plans submitted for plan check <u>prior</u> to issuance of building permits. The final approved site plan must also include all corrections identified in the plan check process.

Conditions of Approval Conditional Use Permit Application No. C-08-292 April 20, 2011 Page 3 of 7

Be advised that on-site inspections will not be authorized <u>unless</u> the final stamped approved site plan, elevations, landscape, and irrigation plans are included in the plan check file copy.

Please contact Israel Trejo at (559) 621-8044 or via e-mail at Israel. Trejo@fresno.gov to schedule an appointment for final sign-off for building permits following your receipt and substitution of the four copies of the stamped, corrected, approved exhibits in the plan check sets.

NOTICE TO PROJECT APPLICANT

In accordance with the provisions of Government Code Section 66020(d)(1), the imposition of fees, dedication, reservations or exactions for this project are subject to protest by the project applicant at the time of approval or conditional approval of the development or within 90 days after the date of the imposition of the fees, dedications, reservation or exactions imposed on the development project.

This notice does not apply to those fees, dedications, reservations or exactions which were previously imposed and duly noticed; or, where no notice was previously required under the provisions of Government Code Section 66020(d)(1) in effect before January 1, 1997.

PART C - PUBLIC IMPROVEMENT REQUIREMENTS

The following requirements are based on city records and the accuracy of the existing and proposed on-site and off-site conditions depicted on the exhibits submitted. Requirements not addressed due to omission or misrepresentation of information, for which this review process is dependent, will be imposed whenever such conditions are disclosed.

Questions relating to dedications, street improvements or off-street parking geometrics may be directed to Louise Gilio at (559) 621-8678 / <u>Louise.Gilio@fresno.gov</u> of the City of Fresno Public Works Department, Engineering Division, Traffic Section.

1. STREET ENCROACHMENT PERMITS, DEDICATIONS AND VACATIONS

- a) Exhibit "A" is required to include all street furniture, e.g.: public utility poles and boxes, guy wires, signs, fire hydrants, bus stop benches, mail boxes, news stands, trash receptacles, tree wells, etc., within the existing and proposed public rights-of-way.
- b) Provide and identify a minimum four (4) foot wide path of travel along the sidewalk directly in front of all properties created within the subdivision as required by Title 24 of the California Administration Code. An on-site pedestrian easement may be required if Title 24 requirements cannot be met within the existing public right-of-way.
- c) ENCROACHMENT PERMITS. The construction of any overhead, surface or sub-surface private structures and appurtenances extending within the public rights-of-way is prohibited unless an encroachment permit is approved by the City of Fresno Public Works Department, Engineering Division, Special Districts/Projects and Right of Way Section, (559) 621-8693. Encroachment permits must be approved <u>prior</u> to issuance of building permits.

Conditions of Approval Conditional Use Permit Application No. C-08-292 April 20, 2011 Page 4 of 7

- d) DEDICATIONS. The following dedication requirements must be satisfied <u>prior</u> to the issuance of building permits:
 - Dedications shall take place in accordance with the Conditions of Approval for the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated April 20, 2011.

2. STREET IMPROVEMENTS

- a) All public improvements shall be constructed in accordance with the Standard Specifications and Standard Drawings of the City of Fresno, Public Works Department or street construction plans required and approved by the City Engineer. The performance of any work within the public street rights-of-way (including pedestrian, water and sewer utility easements) requires a Street Work Permit issued by the Public Works Department, Engineering Services Division at (559) 621-8693, prior to commencement of the work. Contact the Public Works Department, Engineering Services Section at (559) 621-8686 for detailed information. All required street improvements must be completed and accepted by the City prior to occupancy.
- b) Existing off-site concrete improvements to remain in place shall be repaired if damaged and/or off grade as determined by the Public Works Department, Construction Management Division (559) 621-5500. Such repairs must be completed <u>prior</u> to final occupancy.
- c) Design and construct curb, gutter, AC paving, and residential sidewalk patterns to Public Works standards, specifications, and policies. Plans shall be prepared by a registered Civil Engineer.
- d) Submit the following as a single package to the Public Works Department Engineering Division, Plan Check and GIS Mapping Section, (559) 621-8682, for review and approval, prior to issuance of building and street work permits: Street Improvement Plans, Signing and Striping Plans, Street Lighting Plans and Landscape and Irrigation Plans.

3. SURVEY MONUMENTS AND PARCEL CONFIGURATION

a) All survey monuments within the area of construction shall be preserved and if disturbed, shall be reset by a person licensed to practice Land Surveying in the State of California. (Include this note on the site plan.)

PART D - PLANNING/ZONING REQUIREMENTS

1) PLANNING

- a) Development is subject to the following plans and policies:
 - i) "R-1," Single Family Residential District (Section 12-211 of the FMC)
 - ii) 2025 Fresno General Plan
 - iii) Woodward Park Community Plan

Conditions of Approval Conditional Use Permit Application No. C-08-292 April 20, 2011 Page 5 of 7

2) ZONING

a) Approval of Conditional Use Permit Application No. C-08-292 is contingent upon approval of the Major Revision to Vesting Tentative Tract Map No. 5205/UGM.

3) POPULATION DENSITY

- a) Pursuant to the medium density residential planned land use designation for the subject property, the subject property shall be developed in accordance with the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated March 11, 2011 and Exhibit "A" of Conditional Use Permit Application No. C-08-292 dated March 11, 2011.
 - i) A new entitlement will be required in order to revise the current development proposal or authorize an alternative development scheme for the subject property.

4) **BUILDING HEIGHT**

- a) No building or structure erected in the R-1 (*Single Family Residential*) zone district shall have a height greater 35 feet.
- b) All accessory buildings on the lots proposed to be created by the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated March 11, 2011 shall comply with the requirements and provisions of the development standards of the FMC for the R-1 zone district and are subject to the provisions of Section 12-306-N-1 (Accessory Buildings) of the FMC.

5) BUILDING AND YARD SETBACKS AND SPACES BETWEEN BUILDINGS

Setbacks shall be provided in accordance with Exhibit "A" of Conditional Use Permit Application No. C-08-292 and the Conditions of Approval for the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated March 11, 2011.

- a) Any proposed deviation from the building setbacks established by Exhibit "A" of Conditional Use Permit Application No. C-08-292 requires a revision to said Conditional Use Permit.
- b) Spaces between buildings shall be provided in accordance with the approved building setbacks and building envelopes for individual properties respective to Exhibit "A" of Conditional Use Permit Application No. C-08-292 and the Conditions of Approval for the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated March 11, 2011.
- c) Should a drainage channel be proposed between lots 9 and 10 (or other location), the appropriate building setback shall be provided as determined by the Fresno Metropolitan Flood Control District and the Development and Resource Management Department.
- d) Proposed lots 13 and 21 are reversed corner lots. The side yard abutting the street shall not be less than 10 feet.

Conditions of Approval Conditional Use Permit Application No. C-08-292 April 20, 2011 Page 6 of 7

6) LOT COVERAGE

a) Pursuant to the requirements from the Fresno Metropolitan Flood Control District, the developed lot coverage shall be 40% or less, otherwise the applicant shall be required to mitigate the impacts of the increased runoff due to the increased lot coverage to a rate that would be expected if developed to 40% lot coverage. Additionally, the applicant shall indicate on Exhibit A the amount of lot coverage proposed.

7) LANDSCAPING

The number of trees will be determined by the following formula:

Section 12-306-N-24-G-3 of the FMC requires one medium sized tree (30-60 feet at maturity) for each parking space, plus one medium sized tree for each residential unit. Two small size trees (15-30 feet at maturity) may be substituted for one medium size tree.

- a) Trees shall be maintained in good health. Trees may not be trimmed or pruned to reduce the natural height or overall crown of the tree, except as necessary for the health of the tree and public safety; or as may otherwise be approved by the Planning and Development Department. (Include this note on the site plan and landscape plan.)
- b) Landscaping must be in place before issuance of the certificate of occupancy for each individual dwelling.
- c) All yards (including private) and areas designated for open space purposes shall comply with the water efficient landscape standards in accordance with Section 12-306-N-23 of the FMC.

8) FENCES, HEDGES, AND WALLS

Fences, hedges and walls shall be provided in accordance with the Conditions of Approval of for the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated March 11, 20101 and the following:

- a) All fences, hedges and walls shall conform to the provisions of Section 12-306-H of the FMC. All proposed fences and walls must be approved by the Development and Resource Management Department.
- b) There were no walls depicted on Exhibit A dated March 11, 2011. Any walls or fences proposed along the eastern edge of the subject tract shall be approved by the Development and Resource Management Department, including, the Building and Safety Services Division (which will review drainage issues).

PART E - CITY AND OTHER SERVICES

9) Refer to the Conditions of Approval for the Major Revision to Vesting Tentative Tract Map No. 5205/UGM dated April 20, 2011 for all other requirements.

DEPARTMENT OF PUBLIC WORKS

TO:

Israel Trejo, Planner III

Planning Division

FROM:

Hilary Kimber, Parks Supervisor II (559.621.8794)

Engineering Division

DATE:

May 26, 2009

SUBJECT: Tract-5205 (TTM 5205 (T-5273); C-08-292), APN: 579-074-17 (Located on the east side of North Knotting Hill Drive in the Copper River Ranch Project)

The Department of Public Works offers the following comments regarding the requirements for landscaping and irrigation in street rights-of-ways:

GENERAL REQUIREMENTS

STREET TREE REQUIREMENTS

- 1. The subdivider is required to provide street trees on all public street frontages and for the dedication of planting and buffer landscaping easements. Street trees shall be planted at the minimum rate of one tree for each 60' of street frontage by the Developer. The subdivider is required to provide irrigation for all street trees. The irrigation system shall comply with FMC 12-306-23, Water Efficient Landscape Standards.
- 2. **Street Tree Planting by Developer:** For those lots having internal street tree frontage available for street tree planting, the developer shall plant one tree for each 60' of street frontage, or one tree per lot having street frontage, whichever is greater.
 - a. Street tree inspection fees shall be collected for each 60' of public street frontage or one tree per lot whichever is greater.
 - b. Street trees shall be planted in accordance with the City of Fresno, Department of Public Works "Standard Specifications."
 - c. Landscape plans for all public use areas, such as parkways, buffers, medians and outlots, shall be reviewed and approved by the Department of Public Works, Engineering Services. A street tree planting permit shall be required for all residential street tree planting.
 - d. Performance and payment securities, paid with final map, will be released when all landscaping installed on public and/or city controlled property is in conformance with the Specifications of the City of Fresno.
 - e. Upon acceptance of the required work, warranty security shall be furnished to or retained by the city for guaranty and warranty of the work for a period of ninety days following acceptance.

BUFFER LANDSCAPING & MAINTENANCE REQUIREMENTS

- 1. The subdivider shall provide long term maintenance for all proposed landscaped areas by either petitioning for annexation in the Community Facilities District #12 or by forming a Home Owner's Association.
- 2. Maintenance Service Through Annexation into the Community Facilities District.

 Landscape and Irrigation plans are required and shall be submitted to the Department of Public Works for review and approval prior to a Council approval of the final map. Plans shall be numbered to conform to and be included in the Department of Public Works street construction plan set for the final map. Fees are applicable when the subdivider elects to have landscaping maintained by annexing into the City's Community Facilities District.
 - A. Landscaping shall comply with Landscape Buffer Development Standards approved by the City Council on October 2, 1990. Landscape and irrigation plans shall comply with Sections 12-306-23 & 24 and 14-121 of the Fresno Municipal Code regarding Water Efficient Landscaping and Buffer landscaping.
 - B. Should the proposed landscape buffers and/or parkway strips be located next to an existing buffer and/or parkway strip, the planting concept shall simulate the adjacent landscape design to present a more uniform appearance on the street. Variances in the landscape concept will be acceptable, but the design of the new landscape buffer and/or parkway strip shall strive to mimic the existing landscape concept for the Copper River Ranch Project.
 - C. Landscape plans shall indicate grades on a cross-section detail to include fencing or wall details. All fencing shall be placed outside the landscape easement. Maximum slopes shall not exceed 4:1 with 1 foot of level ground between the slope and the back of the side walk and/or face of fence. Erosion control measures shall be implemented on all slopes of 4:1, including the use of synthetic erosion control netting in combination with ground cover species approved by the Department of Public Works/Engineering Services Division.
 - D. The water meter(s) serving the buffer landscaping shall be sized for the anticipated service flows.
 - E. No private flags, signs or identification of any kind shall be permitted in the right-of-way, within the City controlled easement or on the fence or wall facing the street.
 - F. Landscaping in the right-of-way and landscape setback adjacent to water well sites shall be the responsibility of the **City of Fresno Water Division and may not be included in the CFD.**

MEDIAN ISLAND LANDSCAPE REQUIREMENTS

- 1. When median islands front onto the proposed development project, <u>applicants shall</u> submit Plans to the Public Works/Engineering Services showing the location and configuration of all median islands fronting the proposed project.
- 2. The Public Works Department will review and evaluate existing median island(s) for a determination of all required improvements prior to approval of Final Map.
- 3. Landscape and irrigation is required on all new construction of median islands and shall be applied in accordance with the City of Fresno, Public Works Department Standards & Specifications and FMC sections 12-306-24 and 12-306-23. The Public Works Department requires all proposed median islands to be constructed with 2 foot wide colored concrete

- strips, flush along curb edge, in a 12 inch by 12 inch brick red slate pattern.
- 4. Trees shall not be planted in sections which are less than eight (8) feet wide unless approved by the Public Works Department. Sections less than eight (8) feet shall be capped with concrete as an integral part of the off site improvements, whether the median is landscaped or not.

OUTLOTS

The Department of Public Works will not be responsible for the maintenance of any outlots
if they are not included into the Community Facilities District (CFD). If the outlots are to be
included into the CFD, the Department of Public Works will require approving landscape and
irrigation plans to be submitted with landscape buffer plans prior to inclusion into the CFD.

SUBJECT:

Public Works Conditions of Approval

TT 5205 amendment / C-08-292, (North of Copper between Maple and Chestnut)

Highland E. LLC / Gary G. Giannetta

The Public Works Department, Traffic Planning Section, has completed its review and the following requirements are to be placed on this tentative map as a condition of approval by the Public Works Department.

Provide the following information on the tentative tract map and / or complete the following, <u>prior</u> Planning Commission.

1. Identify ingress and egress to an existing public street.

General Conditions:

Comply with all conditions as set forth in T-5205 dated October 26, 2004. Provide required connections from Copper River to Friant Expressway and from Riverbank to Copper at Cedar and Maple in accordance with the Copper River EIR.

- 1. Overhead Utilities: Underground all existing offsite overhead utilities with the limits of this map in accordance with Fresno Municipal Code Section 12-1011 and Resolution No. 78-522/88-229.
- 2. If not existing, street work on major streets shall be designed to include Intelligent Transportation Systems (ITS) in accordance with the Public Works ITS Specifications.
- 3. Design local streets with a minimum of 250' radius.
- 4. <u>Local street lengths</u> exceeding 800' and four way intersections require traffic calming measures. Construct permanent traffic circles. <u>Identify and provide cross sections on the map.</u> **No parking is allowed adjacent to the circles.**
- 5. <u>Garage setback</u>: Provide 20' from the garage to the back of walk. A minimum of 18' is allowed with a roll-up door.
- 6. Outlots: If the subdivider seeks to dedicate to the City, in fee, an outlot for open space purposes, subdivider shall pay all costs and fees associated with the City environmentally assessing the outlot to insure that it is free of toxic or hazardous materials pursuant to the requirements of City Administrative Order 8-1, including, but not limited to, performing a Phase I environmental assessment. The environmental assessment shall be completed and all fees and costs for said environmental assessment shall be paid to the City prior to subdivider's submittal of the Final Map for City approval.

Page 1 of 9

- 7. <u>Plan Submittal</u>: Submit the following plans, as applicable, in a single package, to the Planning and Development Department for review and approval: Street Construction, Signing, Striping, Traffic Signal and Streetlight and Trail Lighting, Signing and Striping.
- 8. Street widening and transitions shall also include utility relocations and necessary dedications.

Frontage Improvement Requirements:

Interior Streets: Private

Construct sidewalks on both sides of the private streets per ADA standards and the 2025 General Plan. Refer to page 69 E-1-j.

Specific Mitigation Requirements:

1. The first order of work shall include a minimum of two points of vehicular access to the major streets for <u>any</u> phase of this development. Identify second point of access.

Traffic Signal Mitigation Impact (TSMI) Fee:

This project shall pay the current Traffic Signal Mitigation Impact Fee (TSMI Fee) at the time of building permit based on the trip generation rate(s) as set forth in the latest edition of the ITE Generation Manual for single family units (fee rate as shown in the Master Fee Schedule).

This TSMI fee is credited against signal installation and Intelligent Transportation System (ITS) improvements (constructed at their ultimate location) anticipated to build out the 2025 General Plan circulation element and included in the Nexus Study for the TSMI fee. Project specific impacts that are not consistent with the 2025 General Plan, Public Works P69 standards, and/or already incorporated into the TSMI fees infrastructure costs are not reimbursable unless the City Engineer and City Traffic Engineer include the new traffic signal and/or ITS infrastructure in the next update and the applicant agrees to pay the new calculated TSMI fee that includes the new infrastructure. Failure to pay this fee or construct improvements that are credited/reimbursable with this fee will result in a significant unmitigated impact as this fee is applied to all projects within the City Sphere of Influence. If the applicant is conditioned with improvements that are credited/reimbursable with this fee they should work with the Department of Public Works and identify with a Professional Engineers estimate the costs associated with the improvements prior to paying the TSMI fee at time of building permit.

Fresno Major Street Impact (FMSI) Fee:

Pay all applicable growth area fees and City-wide regional street impact fees.

Copper River Ranch Associated Major Roadway Infrastructure Fee:

Applicant shall pay fair share contribution.

Copper River Ranch Interior Collector Roadway Facility Fee:

Applicant shall pay fair share contribution.

State of California Department of Transportation (Caltrans) Fees:

Applicant shall pay fair share contribution as determined by the State of California Department of Transportation (Caltrans) to be collected by the City of Fresno Public Works Department Traffic Engineering **prior** to a Final Map.

SUBJECT:

TT 5205, Revised Public Works Conditions of Approval

The Public Works Department, Traffic Planning Section, has completed its review of Tentative Tract Map **5205**, which was submitted by **Copper River Ranch LLC**. The subdivision is located northeast of Copper Avenue and Friant Road. The following requirements are to be placed on this tentative tract map as a condition of approval by the Public Works Department.

General Conditions:

- 1. Handicap access ramps are required at all corners within the limits of this tract.
- 2. All required signing and striping shall be done and paid for by the developer/owner. The signing and striping plans shall be done per the current Caltrans standards and shall be submitted along with the street construction plans for this tentative map to the Public Works Department.
- 3. Underground all existing offsite overhead utilities with the limits of this map in accordance with Fresno Municipal Code Section 12-1011, 8-801 and Resolution No. 78-522/88-229.
- 4. Wedge curbing and/or rolled curbs are not an approved Public Works Standard and therefore such will not be approved on any proposed public streets within this subdivision. Construct all curb and gutter to Public Works Standard P-5.
- 5. While the tentative tract map exhibits and its accompanying conditional use permit present several non-standard improvements, all of which are not approved. All improvements to be installed within public streets shall comply with the current Public Works Standards in effect at the time of construction.
- 6. Submit details for the proposed gated entries prior to conceptual approval.
- 7. Submit cross sections for the following prior to conceptual approval:
 - a. Maple Avenue
 - b. Friant Road
 - c. Copper Avenue's Multi-Purpose Trail (bike, pedestrian and equestrian)
 - d. All mid-block golf cart / Neighborhood Electric Vehicle (NEV) crossings
- 8. Any work within the County's jurisdiction shall be based on Fresno County Standards.

Frontage Improvement Requirements:

Major Streets:

North Friant Road: Scenic Expressway

- 1. Construct concrete curb and gutter to Public Works Standard P-5 within the limits of this development. (No sidewalk)
- 2. Construct an 80-foot bus bay at the northeast corner of Friant Road and Copper Avenue. Concrete curb and gutter shall be constructed to the City of Fresno's Standard Drawing P-73, complete with a 10-foot monolithic sidewalk.
- 3. Construct twenty (20) feet of permanent paving within the limits of this development. Construct transition paving, as necessary, based on a **55 mph** design speed.
- 4. Construct an underground street lighting system to Public Works Standard E-1, within the limits of this development. Spacing and design shall conform to Public Works Standard E-10 for Expressways.
- 5. Relinquish direct vehicular access rights to North Friant Road from all lots within this development.

East Copper Avenue: Super Arterial

- 1. Dedicate an easement for public street purposes per the Director's Determination. Dedicate 23'-27' measured from section line, from Cedar to Chestnut Avenues.
- 2. Construct concrete curb and gutter to Public Works Standard P-5 within the limits of this development. (No sidewalk. See planning comments for trail requirements)
- 3. Construct an 80 foot bus bay at the northwest corner of Copper/Cedar, Copper/Maple and Copper/Millbrook. Concrete curb and gutter shall be constructed to Public Works Standard P-73, complete with a monolithic sidewalk.
- 4. Construct twenty (20) feet of permanent paving within the limits of this development. Construct transition paving, as necessary, based on a **55 mph** design speed.
- 5. Construct an underground street lighting system to Public Works Standard E-1, within the limits of this development. Spacing and design shall conform to Public Works Standard E-7 for Arterial Streets.
- 6. Relinquish direct vehicular access rights to East Copper Avenue from all residential properties within this development.

North Maple Avenue:4-lane w/dual left turns all around

- 1. Dedicate an easement for public street purposes, within the limits of this development to meet the current City of Fresno Arterial Standards to accommodate: 4-12' lanes, 1-12' right turn lane, 2-11' left turn lanes, 2-5' bike lanes, a 5' wide median nose and 10' curb patterns. An additional 2' shall be required adjacent to any medians placed adjacent to the through lanes. The minimum edge of the electrical tower to face of curb clearance shall be 5'. Design speed shall be 45 mph for Maple Avenue.
- 2. Construct concrete curb, gutter and sidewalk to Public Works Standard **P-5**. The sidewalk pattern shall be constructed to a 10-foot commercial pattern.
- 3. Construct an 80-foot bus bay at the northeast corner of Copper/Maple. Concrete curb and gutter shall be constructed to the Public Works Standard **P-73**, complete with a 10-foot monolithic sidewalk.
- 4. Construct twenty (20) feet of permanent paving within the limits of this development.

- 5. Construct an underground street lighting system to Public Works Standard E-1 within the limits of this development. Spacing and design shall conform to Public Works Standard E-7 for Arterial Streets.
- 6. Relinquish direct vehicular access rights to the southerly 150' of Maple Avenue from all lots within this development.

North Cedar Avenue: Collector, 4-lane (to be constructed on both sides)

- 1. Dedicate **94'-110'** of property for public street purposes, within the limits of this development to meet the current City of Fresno Collector Standards.
- 2. Construct concrete curb, gutter and sidewalk to Public Works Standard **P-5**. The sidewalk pattern shall be constructed to a 10-foot residential pattern.
- 3. Construct an 80-foot bus bay at the northeast corner of Copper/Cedar. Concrete curb and gutter shall be constructed to Public Works Standard **P-73**, complete with a 10-foot monolithic sidewalk.
- 4. Construct twenty (20) feet of permanent paving within the limits of this development.
- 5. Construct an underground street lighting system to Public Works Standard E-1 within the limits of this development. Spacing and design shall conform to Public Works Standard E-8 for Collector Streets.
- 6. Relinquish direct vehicular access rights to Cedar Avenue from any single family residential within this development.

Friant Entrance Road: Collector (to be constructed on both sides)

- 1. Dedicate an easement for public street purposes, within the limits of this development to meet the current City of Fresno Collector Standards. Additional right of way shall be dedicated to accommodate dual left turns. The minimum curb-to-curb width for eastbound traffic shall be 30' and the minimum width for westbound shall be 39' (2-11', 1-5', 1-12').
- 2. Construct concrete curb, gutter and sidewalk to Public Works Standard **P-5**. The sidewalk pattern shall be constructed to a 10-foot residential pattern. Alternate patterns can be considered.
- 3. Construct twenty (20) feet of permanent paving along the frontage within the limits of this development.
- 4. Construct an underground street lighting system to Public Works Standard E-1 within the limits of this development. Spacing and design shall conform to Public Works Standard E-8 for Collector Streets.
- 5. Relinquish direct vehicular access rights to Friant Entrance Road from all lots within this development.

Collectors No. 1 and No. 2 see exhibit "A" (to be constructed on both sides)

- 1. Dedicate **up to 110**' of property for public street purposes, within the limits of this development to meet the current City of Fresno Collector Standards.
- 2. Construct concrete curb, gutter and sidewalk to Public Works Standard **P-5**. The curb shall be constructed to a 10-foot pattern.
- 3. Construct an 80 foot bus bay at the southwest corner of Collector 1/Collector 2 and at the southwest corner of Collector 2/Maple. Concrete curb and gutter shall be constructed to Public Works Standard **P-73**, complete with a 10-foot monolithic sidewalk.
- 4. Construct twenty (20) feet of permanent paving within the limits of this development.

- 5. Construct an underground street lighting system to Public Works Standard E-1 within the limits of this development. Spacing and design shall conform to Public Works Standard E-8 for Collector Streets.
- 6. Relinquish direct vehicular access rights to Collector No. 1 and No. 2 from all lots within this development as shown on the preliminary tentative tract map.

Local Streets:

Design and construct all curb, gutter, sidewalk (both sides), permanent paving, cul-de-sacs, and underground street lighting systems on all interior local streets to Public Works Standards. Sidewalk patterns shall comply with Public Works Standards.

Any dead-end streets created by this subdivision shall be properly barricaded in accordance with the Pubic Works Standard **P-44**.

- 1. All contact points with major streets shall be constructed to Public Works Standard API-1.
- 2. In order to maintain the proposed 40' right-of-way, the developer shall designate them as <u>"Private Streets"</u> **OR** all streets with a proposed 40' right-of-way **shall be changed** to 44' minimum right-of-way provided that the following conditions can be accommodated:
 - a. Provide a 36' minimum width from curb to curb.
 - b. Provide 4' minimum from curb face to property line.
 - c. Prior to approval, verify the location of all utilities within the street right-of-way. Submit a cross section indicating the layout for all utilities. (*Fire hydrants, streetlights, PG&E, telephone, cable, pull boxes, FMFCD utilities, street signs, mailboxes, etc.*)
- 3. The proposed 50' street cross section shall be revised to reflect the following:
 - a. The minimum curb face to walk shall be 5.5'
 - b. An additional 1.5' P.E. is necessary for a total of 2.5'.
 - c. Construct a minimum 4' sidewalk.
- 4. The proposed 56' street cross section shall be revised to reflect the following:
 - a. Identify a 4' pedestrian easement on both sides of the street.
- 5. The proposed 60' street cross section shall be revised to reflect the following:
 - a. Identify a 4' pedestrian easement on both sides of the street.
- 6. Local Collector No. 3, see Exhibit "A"
 - a. Dedicate 72' of property for public street purposes, within the limits of this development.
 - b. Construct concrete curb, gutter and sidewalk to Public Works Standard P-5. The sidewalk pattern shall be constructed to a 12-foot residential pattern.

Specific Traffic Mitigation Requirements: 829 lots

This tract will generate **622 a.m.** / **838 p.m.** peak hour trips, therefore, a Traffic Impact Study (TIS) is required to comply with the mitigation measure requirements of the 2025 General Plan circulation element. A project trip generation and trip trace study has been submitted to Traffic Planning for a TIS "scope". The TIS scope for this project was provided to the developer on February 4, 2004. On October 07, 2004 a TIS report was submitted to the City of Fresno for staff's evaluation. Please refer to TIS comments memo dated October 26, 2004 for additional improvement requirements that need to be mitigated by this project.

- 1. The first order of work shall include a minimum of two permanent points of vehicular access to major streets for <u>any</u> phase of this development.
- 2. All Well Sites shall be accessed from interior streets. Any other proposals will require the approval of Traffic Engineering.

- 3. The proper design of the roundabouts may necessitate more or less right-of-way. This shall be determined at the street plan design stage of this project. Roundabouts shall comply with Federal, State and ADA guidelines and shall be subject to review and approval from a private consultant and the City of Fresno.
- 4. Provide full off-site improvements adjacent to the PG &E parcel located on Copper between Cedar and Maple.
- 5. Dedicate and construct a northbound right turn lane along Friant Road at the Friant Entrance Road. The right turn lane shall be a minimum of 250' or 25' per queued vehicle, as indicated in the required Traffic Impact Study, whichever is greater.
- 6. Dedicate and construct a 20' wide emergency access from this subdivision to Willow Avenue.
- 7. Multi-Purpose Trail:
 - a. Provide a Multi-Purpose Trail easement:
 50' wide, on the south side of outlet FF within the limits of the proposed neighborhood commercial site at the northeast corner of Friant and Copper.
 - b. Construct the Multi-Purpose Trail within the required easements.
 - c. Identify the Multi-Purpose Trail Easement on Copper from Maple to the easterly boundaries of this subdivision.
- 8. Relinquish direct vehicular access rights to:
 - a. The south property line of lot 34.
 - b. The southwest property line of lots 253,679 and 663.
 - c. The northeast property line of lots 252,581 and 664.
 - d. The east property line of lots 351 and 823.

UGM Requirements:

This subdivision is outside the current UGM boundaries but within the City sphere of influence. The applicant has proposed an impact fee program to fund infrastructure needed to address specific impacts associated with the proposed Tract. As a minimum, the impact fee program shall facilitate construction of the street and intersection improvements within and adjacent to this subdivision. The Applicant shall cause to prepare an amendment to the UGM program for Council consideration to adopt the proposed impact fees for this subdivision.

The Applicant shall identify a mechanism to fund maintenance of all landscape, entrance features, benches, trails, lighting, etc. within the proposed public easements. The Applicant may utilize a homeowners association or they may petition the Council to form a Community Facilities District in accordance with state guidelines and statutes.

North Friant Road: Scenic Expressway

- Construct (2) two twenty (20) foot UGM center section travel lanes within the limits of this
 development. Details of said street shall be depicted on the approved tentative tract map.
 Dedication shall be sufficient to accommodate the number of lanes determined by the Traffic
 Impact Study and any other grading or transitions and drainage, as necessary based on a 55
 MPH design speed.
- 2. Construct an 8" raised concrete median island within the limits of this development (22' to 26' in width).

East Copper Avenue: Super Arterial

- Dedicate and construct two (2) twenty (20) foot center section travel lanes within the limits of this
 development. Details of said street shall be depicted on the approved tentative tract map.
 Dedication shall be sufficient to accommodate dual left turn lanes at the Copper/Maple
 intersection and any other grading, transitions and / or drainage requirements, as necessary,
 based on a 55 MPH design speed.
- 2. Construct an 8" raised concrete median island within the limits of this subdivision. Provide 250' left turn lanes at all intersections.
- 3. Construct dual left turn lanes at all legs and the intersection of Copper / Maple.

North Maple Avenue: Collector w/dual left turns

- 1. Construct two (2) seventeen (17) foot center section travel lanes within the limits of this development south to the intersection with Copper Avenue. Details of said street shall be depicted on the approved tentative tract map. Dedication and construction shall be sufficient to accommodate for dual left turns at the intersection of Maple and Copper.
- 2. Construct an 8" raised concrete median island within the limits of this development.

North Cedar Avenue: Collector

1. Construct two (2) seventeen (17) foot center section travel lanes within the limits of this development. Dedication and construction shall be in accordance with Public Works Standard P-69.

Friant Entrance Road: Collector

- 1. Construct two (2) seventeen (17) foot center section travel lanes within the limits of this development. Dedication and construction shall be in accordance with Public Works Standard P-69.
- 2. Additional right of way shall be dedicated to accommodate dual left turns.

Collectors No. 1 and No.2 (see exhibit "A")

1. Construct two UGM center section travel lanes within the limits of this development. Dedication and construction shall be in accordance with Public Works Standard **P-69**.

Public Utilities Department, Planning and Engineering Division

Subject: SANITARY SEWER REQUIREMENTS FOR VESTING TENTATIVE TRACT MAP

5205/UGM, AND C-08-292

Project Description

T-5205/UGM and C-08-292, a 20-lot single family residential private street planned development project with 2 outlots on approximately 13 acres of R-1/UGM zone property located within the Copper River Ranch Planned Community, 11148 North Knotting Hill Drive, APN 579-074-17. This map has been submitted as a major amendment to the previously approved T-5205/UGM. C-08-292 is requesting a planned development with gated entry, private street and reduced setbacks.

Sanitary Sewer Requirements

The nearest sanitary sewer main to serve the proposed project is a 12-inch sewer main located in North Knotting Hill Drive. The following conditions shall be required to provide sewer service to the project.

- 1. Construct a 12-inch sanitary sewer main in Outlot "A" from North Knotting Hill Drive to provide sanitary sewer service to each lot created.
- 2. Separate sewer house branches are required for each lot.
- 3. Abandon any existing on-site private septic systems.
- 4. Street easements and/or deeds shall be recorded prior to approval of improvement plans.
- 5. All underground street utilities shall be installed prior to permanent street paying.
- 6. Engineered improvement plans prepared by a Registered Civil Engineer shall be submitted for Department of Public Utilities review and approvals for proposed additions to the City Sewer System.
- 7. All public sanitary sewer facilities shall be constructed in accordance with City Standards, specifications, and policies.

Sanitary Sewer Fees

The following Sewer Connection Charges shall be paid for the Project:

- 1. Lateral Sewer Charge.
- 2. Sewer Oversize Charge.
- 3. Sewer Facility Charge (Residential Only).
- 4. Trunk Sewer Charge: C.R.R. Sewer Backbone system facility fee.
- 5. Trunk Sewer Charge: Herndon
- 6. Copper Avenue sewer lift-station service fee

DEPARTMENT OF PUBLIC UTILITIES - WATER DIVISION

DATE:

May 27, 2009

Providing Life's Essential Services

TO:

DOUG HECKER, Supervising Engineering Technician

Department of Public Utilities, Administration

FROM:

MICHAEL CARBAJAL, Supervising Engineering Technician

Department of Public Utilities, Water Division

SUBJECT:

WATER REQUIREMENTS FOR TENTATIVE TRACT NO. 5205

The following conditions are required to provide water service to the tract.

- 1. Construct a water supply well(s) on a site(s) dedicated to the City of Fresno. The well(s) shall be capable of producing a total of 500 gallons per minute. Well sites shall be of a size and at a location acceptable to the Assistant Director of Public Utilities.
- 2. Water well construction shall include wellhead treatment facilities, if required.
- 3. No occupancies will be permitted prior to the satisfaction of the water supply requirement.
- 4. Separate water services with meters shall be provided to each lot created.
- 5. Two independent sources of water, meeting Federal and State Drinking Water Act Standards, are required to serve the tract including any subsequent phases thereof. The two-source requirement may be accomplished through a combination of water main extensions, construction of supply wells, or other acceptable sources of water supply approved by the Water Systems Manager.
- 6. All public water facilities shall be constructed in accordance with Public Works Department standards, specifications, and policies.
- 7. Seal and abandon existing on-site well(s) in compliance with the State of California Well Standards, Bulletin 74-90 or current revisions issued by California Department of Water Resources and City of Fresno standards.
- 8. All proposed water main easements shall be clear and unobstructed by buildings or other structures. No fencing or wall shall either enclose or be located above the water main. The planting plan for any proposed landscape within the easement shall be approved by the Department of Public Utilities. No trees shall be located within 8 feet of the water main. All water mains within an easement shall be clearly marked with signage above indicating the exact location and type of facility below.

9.	The development shall implement mitigation measures such as the installation of low flow fixtures, the use of artificial lawn or xeriscape, the use of evapotranspiration controllers, etc., to facilitate water consumption at a rate of 243 gallons per person per day.

Street Name Review

TM-5205 revised

5-21-09

Street Name	Status	Required Change
North Knotting Hill Drive	Good	

Note: Submit new street names for private streets for review and approval.

Names must be unique to the County of Fresno and must not have the suffix of avenue, road, or street.

June 9, 2009

TO:

Israel Trejo, Planner III

Development Department, Planning Division

THROUGH: Robert Weakley, Chief of Operations

Department of Public Utilities, Solid Waste Division

FROM:

Chris Weibert, Management Analyst II

Department of Public Utilities, Administration

SUBJECT:

TT 5205/UGM and C-08-292, Solid Waste Conditions of Approval

Location: Copper River Ranch, 11148 North Knotting Hill Drive, APN 579-074-17

The Department of Public Utilities, Solid Waste Division has completed a review of the Vesting Tentative Tract Map 5205 that was submitted by Gary G. Giannetta, on behalf of Copper River Development Company, Inc. The following requirements and conditions are to be placed on this vesting tentative tract maps as a condition of approval by the Department of Public Utilities.

General Requirements:

- Tract 5205 will be serviced as Single Family Residential properties with Basic Container Service. Property owners will receive 3 containers to be used as follows: 1 Gray container for solid waste, 1 Green container for green waste and 1 Blue container for recyclable material.
- The owners, lessees or other tenants of the residential dwellings on service day, before 5:30 a.m., shall place their solid waste containers at the edge of the curb approximately 4 feet apart and shall not block any vehicle accesses, nor be placed within any traffic circle, in accordance with the City of Fresno's Solid Waste Management Division Standards.
- Per Municipal Code, Section 6-205 Solid Waste, Recycling and Green Waste Disposal Regulations, Section (c)(11). No solid waste container nor residential rubbish shall be allowed to remain at the curbline after 8:00 p.m. on the collection day.
- Per Municipal Code, Section 6-205 Solid Waste, Recycling and Green Waste Disposal Regulations, Section (c)(10). No material container shall be stored in the front yard or side yard on a street as said yards are described in Chapter 12, Articles 2 and 3 of this Code, unless the container is screened from view from the street in accordance with that article of the Code.

Special Conditions:

Gated entrances require 18' of clearance for Solid Waste vehicles.

Covenant Requirements:

There shall be no parking allowed in the cul-de-sacs on the solid waste service day. All lots that are part of a cul-de-sac shall be clear of all vehicles by 5:30 a.m.

• Lots 5, 6, 9, 10, 17, and 18 and 19

March 2, 2011

TO:

ISRAEL TREJO, Planning Manager

Planning and Development Department, Planning Division

FROM:

MIKE SCHMIDT, Senior Fire Prevention Inspector

Fire Department, Fire Prevention and Investigation Division

SUBJECT: REVISED TENTATIVE TRACT NO. 5205

The Fire Department has completed a review of the Tentative Tract Map 5205 which was submitted by Gary Giannetta. The following requirements and conditions are to be placed on this vesting tentative tract map as a condition of approval by the Fire Department.

General Requirements:

This project is within 1 mile of Fire Station No. 17.

This project is subject to city wide fire service fees.

Provide residential / commercial fire hydrants and fire flow per Public Works standards.

The fire hydrants shall be protected by bollards because there are not regular curbs to protect them.

6 21

Development of lots #18 through 26 is contingent upon the completion of the second access path to the east through T-5903. Development on those lots may proceed once completion of the 2nd access is documented.

Any lots beyond 450 feet from a single point of access will require fire sprinklers if built before a second point of access is provided.

Post the cul-de-sacs as fire lanes, the turn radius are too tight to turn around a fire truck.

Phasing of the project will require additional review for access and hydrants.

Note: original comments from the pre-application meeting for this project have not been addressed on this plan.

PRELIMINARY FEE(S) (See below)

DRAINAGE AREA
DRAINAGE AREA
TOTAL FEE

PRELIMINARY FEE(S) (See below)

1 DE " \$102,167.00

The proposed development will generate storm runoff which produces potentially significant environmental impacts and which must be properly discharged and mitigated pursuant to the California Environmental Quality Act and the National Environmental Policy Act. The District in cooperation with the City and County has developed and adopted the Storm Drainage and Flood Control Master Plan. Compliance with and implementation of this Master Plan by this development project will satisfy the drainage related CEQA/NEPA impact of the project mitigation requirements.

The proposed development shall pay drainage fees pursuant to the Drainage Fee Ordinance prior to approval of the final map at the rates in effect at the time of such approval. The fee indicated above is based on the tentative map. Contact the FMFCD project engineer prior to approval of the final map for the fee.

Considerations which may affect the fee obligation(s) or the timing or form of fee payment:

- a) Fees related to undeveloped or phased portions of the project may be deferrable.
- b) Fees may be calculated based on the actual percentage of runoff if different than that typical for the zone district under which the development is being undertaken and if permanent provisions are made to assure that the site remains in that configuration.
- c) Master Plan storm drainage facilities may be constructed, or required to be constructed in lieu of paying fees.
- d) The actual cost incurred in constructing Master Plan drainage system facilities is credited against the drainage fee obligation.
- e) When the actual costs incurred in constructing Master Plan facilities exceeds the drainage fee obligation, reimbursement will be made for the excess costs from future fees collected by the District from other development.

Page 2 of 4

Any request for a drainage fee refund requires the entitlement cancellation and a written request addressed to the General Manager of the District within 60 days from payment of the fee. A non refundable \$300 Administration fee or 5% of the refund whichever is less will be retained without fee credit.

Approval of this development shall be conditioned upon compliance with these District Requirements.

		Appears to be located within a 500 year flood prone area as designated on the latest Flood Insurance Rate Maps available to the District.
	<u>X</u>	Does not appear to be located within a flood prone area.
6.		The subject site contains a portion of a canal or pipeline that is used to manage recharge, storm water, and/or flood flows. The existing capacity must be preserved as part of site development. Additionally, site development may not interfere with the ability to operate and maintain the canal or pipeline.

7. The Federal Clean Water Act and the State General Permits for Storm Water Discharges Associated with Construction and Industrial Activities (State General Permits) require developers of construction projects disturbing one or more acres, and discharges associated with industrial activity not otherwise exempt from National Pollutant Discharge Elimination System (NPDES) permitting, to implement controls to reduce pollutants, prohibit the discharge of waters other than storm water to the municipal storm drain system, and meet water quality standards. These requirements apply both to pollutants generated during construction, and to those which may be generated by operations at the development after construction.

- State General Permit for Storm Water Discharges Associated with Construction a. Activities, approved August 1999, (modified December 2002.) A State General Construction Permit is required for all clearing, grading, and disturbances to the ground that result in soil disturbance of at least one acre (or less than one acre if part of a larger common plan of development or sale). Permittees are required to: submit a Notice of Intent to be covered and must pay a permit fee to the State Water Resources Control Board (State Board), develop and implement a storm water pollution prevention plan, eliminate non-storm water discharges, conduct routine site inspections, train employees in permit compliance, and complete an annual certification of compliance.
- b. State General Permit for Storm Water Discharges Associated with Industrial Activities, April, 1997 (available at the District Office.) A State General Industrial Permit is required for specific types of industries described in the NPDES regulations or by Standard Industrial Classification (SIC) code. The following categories of industries are generally required to secure an industrial permit: manufacturing; trucking; recycling; and waste and hazardous waste management. Specific exemptions exist for manufacturing activities which occur entirely indoors. Permittees are required to: submit a Notice of Intent to be covered and must pay a permit fee to the State Water Resources Control Board, develop and implement a storm water pollution prevention plan, eliminate non-storm water discharges, conduct routine site inspections, train employees in permit compliance, sample storm water runoff and test it for pollutant indicators, and annually submit a report to the State Board.

Page 4 of 4

- c. The proposed development is encouraged to select and implement storm water quality controls recommended in the Fresno-Clovis Storm Water Quality Management Construction and Post-Construction Guidelines (available at the District Office) to meet the requirements of the State General Permits, eliminate the potential for non-storm water to enter the municipal storm drain system, and where possible minimize contact with materials which may contaminate storm water runoff.
- 8. A requirement of the District may be appealed by filing a written notice of appeal with the Secretary of the District within ten days of the date of this Notice of Requirements.
- 9. The District reserves the right to modify, reduce or add to these requirements, or revise fees, as necessary to accommodate changes made in the proposed development by the developer or requirements made by other agencies.

10. X See Exhibit No. 2 for additional comments, recommendations and requirements.

Gerald E. Lakeman,
District Engineer

Project Engineer: Neda Shakeri

C: GARY G. GIANNETTA 1119 "S" STREET FRESNO, CA 93721

THIS MAP IS SCHEMATIC DISTANCES ARE APPROXIMATE. EXHIBIT NO. 1

OTHER REQUIREMENTS EXHIBIT NO. 2

The Master Plan system has been designed such that during a two-year event flow will not exceed the height of the 6 inch curb. Should wedge curb (4.5 inches height) be used the same criteria shall apply whereby flow remains below the top of curb. Any extensions or pipe size increases due to meeting the requirement listed above shall be at the developer's expense.

The District recommends a stub street to the east in the southerly portion of Tract 5205. This is necessary to provide surface drainage and major storm conveyance from APNs 579-074-30s and 33s to the existing Master Plan inlet in Tract 5205. If the stub street is not constructed, then the developer of Tract 5205 shall provide for surface drainage of storm water in the form of an improved channel.

The developed lot coverage shall be 40% or less, otherwise, the developer shall be required to mitigate the impacts of the increased runoff due to the increased lot coverage to a rate that would be expected if developed to 40% maximum lot coverage. The developer may either make improvements to the existing pipeline system to provide additional capacity or may use some type of permanent peak reducing facility in order to eliminate adverse impacts on the existing storm drainage system.

ADDRESS

11148 N. KNOTTING HILL DR.

The proposed development will generate storm runoff which produces potentially significant environmental impacts and which must be properly discharged and mitigated pursuant to the California Environmental Quality Act and the National Environmental Policy Act. The District in cooperation with the City and County has developed and adopted the Storm Drainage and Flood Control Master Plan. Compliance with and implementation of this Master Plan by this development project will satisfy the drainage related CEQA/NEPA impact of the project mitigation requirements.

The proposed development shall pay drainage fees pursuant to the Drainage Fee Ordinance prior to issuance of a building permit at the rates in effect at the time of such issuance. The fee indicated above is valid through February 28, 20 10 based on the site plan submitted to the District on 05/08/09 Contact FMFCD for a revised fee in cases where changes are made in the proposed site plan which materially alter the proposed impervious area.

Considerations which may affect the fee obligation(s) or the timing or form of fee payment:

- a) Fees related to undeveloped or phased portions of the project may be deferrable.
- b) Fees may be calculated based on the actual percentage of runoff if different than that typical for the zone district under which the development is being undertaken and if permanent provisions are made to assure that the site remains in that configuration.
- c) Master Plan storm drainage facilities may be constructed, or required to be constructed in lieu of paying fees.
- d) The actual cost incurred in constructing Master Plan drainage system facilities is credited against the drainage fee obligation.
- e) When the actual costs incurred in constructing Master Plan facilities exceeds the drainage fee obligation, reimbursement will be made for the excess costs from future fees collected by the District from other development.

May 27, 2009

Fresno County 2600 Fresno St. Third Floor Fresno, CA 93721 Attn: Israel Trejo

Dear Israel Trejo,

We have received your request for comments notice for the Vesting Tentative Tract Map No. 5205 in the Copper River Ranch Planned Community.

Expansion of distribution and transmission lines and related facilities are a necessary consequence of growth and development. In addition to adding new distribution feeders, the range of electric system improvements needed to accommodate growth may include upgrading existing substation and transmission line equipment, expanding existing substations to their ultimate buildout capacity, and building new substations and interconnecting transmission lines. Comparable upgrades or additions needed to accommodate additional load on the gas system could include facilities such as regulator stations, odorizer stations, valve lots, distribution and transmission lines.

We would also like to note that continued development consistent with your General Plans will have a cumulative impact on PG&E's gas and electric systems and may require on-site and off-site additions and improvements to the facilities which supply these services. Because utility facilities are operated as an integrated system, the presence of an existing gas or electric transmission or distribution facility does not necessarily mean the facility has capacity to connect new loads.

If PG&E has an existing pole line facility that serves the property and the existing pole line crosses proposed property lines (and is not covered by an existing easement), it is the property owner's responsibility to provide PG&E with adequate rights-of-way. PG&E is available to assist the property owner in making the determination if an easement will be necessary. The property owner or their agent may contact the undersigned for assistance.

Existing gas or electric facility relocations necessitated by new street improvements will be at the expense of the developer. Because facility relocation's require long lead times and are not always feasible, developers should be encouraged to consult with PG&E as early in their planning stages as possible.

PG&E remains committed to working with the County of Madera to provide timely, reliable and cost effective gas and electric service.

Thank you for the opportunity to review the plans of this Vesting Tentative Tract Map. If you have any questions, please contact me at 263-5240.

Sincerely,

Gage Fleming

Land Agent

## CITY OF FRESNO – ENVIRONMENTAL ASSESSMENT FINDING OF CONFORMITY / MEIR NO. 10130/MND FOR PLAN AMENDMENT A-09-02 (AIR QUALITY MND)

Pursuant to Section 21157.1 of the California Public Resource Code (California Environmental Quality Act) the project described below is determined to be within the scope of the Master Environmental Impact Report (MEIR) No. 10130 prepared for the 2025 Fresno General Plan

DATE RECEIVED FOR FILING:

Applicant:
Gary McDonald
11326 North Glencastle Avenue

Fresno, CA 93730

**Initial Study Prepared By:** 

Planner: Israel Trejo Date: March 18, 2011

Environmental Assessment Number: T-5205/C-08-292

Major Revision to Vesting Tentative Tract Map No. 5205/UGM and Conditional Use Permit Application No. C-08-292

**Project Location (including APN):** 

East side of North Knotting Hill Drive, north of

East Copper Avenue

(APN: 579-074-17)

## **Project Description:**

Gary Giannetta, on behalf of Gary McDonald Homes has filed Conditional Use Permit Application No. C-08-292 and Major Revision to Vesting Tentative Tract Map No. 5205/UGM pertaining to approximately 13.07 acres of property located on the east side of the North Knotting Hill Drive, north of East Copper Avenue.

The property is located within the jurisdiction of the Woodward Park Community Plan and the 2025 Fresno General Plan. The Woodward Park Community Plan and the 2025 Fresno General Plan designate the subject property for medium density residential planned land uses. The application is a request to subdivide the property into a 21 lot gated single family residential private street subdivision. The existing R-1/UGM/cz (Single Family Residential District/Urban Growth Management/conditions of zoning) zone district is consistent with the planned land use designation of medium density.

The subject property is currently vacant.

## Conformance to Master Environmental Impact Report (MEIR) NO. 10130:

The adopted 2025 Fresno General Plan and the Woodward Park Community Plan designate the subject site for medium density residential planned land uses. The existing R-1/UGM/cz (Single Family Residential/Urban Growth Management/conditions of zoning) zone district for the subject property conforms to the medium density residential planned land use designation.

The Planning and Development Department staff has prepared an Initial Study (See Attached "Modified Appendix G To Analyze Subsequent Project Identified In MEIR No. 10130/MND For Plan Amendment A-09-02 (Air Quality MND)/Initial Study") to evaluate the proposed Conditional Use Permit and Vesting Tentative Tract Map application(s) in accordance with the land use and environmental policies and provisions of lead agency City of Fresno's 2025 Fresno General Plan (SCH # 2001071097), the related Master Environmental Impact Report (MEIR) No. 10130 and the Mitigated Negative Declaration prepared for Plan Amendment A-09-02 to amend the Air Quality Element of the 2025 Fresno General Plan (Air Quality MND). The subject property is currently vacant but may be further developed at an intensity and scale that is permitted by the planned land use designation and proposed zone district classification for the site. Thus, the proposed Conditional Use Permit and Vesting Tentative Tract Map application(s) will not facilitate an additional intensification of uses beyond that which already exists or would be allowed by the above-noted planned land use designation. Moreover, it is not expected that the future development will adversely impact existing city service systems or the traffic circulation system that serves the subject property. These infrastructure findings have been verified by the Public Works and Public Utilities Departments. It has been further determined that all applicable mitigation measures of MEIR No. 10130 and the Air Quality MND have been applied to the project necessary to assure that the project will not cause significant adverse cumulative impacts, growth inducing impacts, and irreversible significant effects beyond those identified by MEIR No. 10130 as provided by CEQA Guidelines Section 15177(b)(3).

Finding of Conformity Under MEIR No. 10130 and the Air Quality MND prepared for Conditional Use Permit Application No. C-08-292 and Major Revision to Vesting Tentative Tract Map No. 5205/UGM Environmental Assessment No. T-5205/C-08-292 March 18, 2011 Page 2

Pursuant to Section 21157.1 of the California Public Resources Code (California Environmental Quality Act), it may be determined that a subsequent project, as identified in the MEIR pursuant to Section 21157(b)(2) of the Public Resources Code and CEQA Guidelines Section 15177, falls within the scope of a MEIR, provided that the project does not cause additional significant impacts on the environment that were not previously examined by the MEIR and the Air Quality MND.

Relative to this specific project proposal, the environmental impacts noted in the MEIR and the Air Quality MND, pursuant to the 2025 Fresno General Plan land use designation, include impacts associated with the low density residential planned land use designation specified for the subject property. Based on this Initial Study, the following findings are made: (1) The proposed project was identified as a Subsequent Project in MEIR No. 10130 because its, location, land use designation and permissible densities and intensities are set forth in Figure I-1 of MEIR No. 10130; (2) The proposed project is fully within the scope of the MEIR and Air Quality MND because it will not generate additional significant effects on the environment not previously examined and analyzed by the MEIR or Air Quality MND for the reasons set forth in the Initial Study; and (3) other than identified below, there are no new or additional mitigation measures or alternatives required.

In addition, after conducting a review of the adequacy of the MEIR pursuant to Public Resources Code Section 21157.6(b)(1), the Planning and Development Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the Air Quality MND was adopted and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete and the Air Quality MND was adopted, has become available. Moreover, as lead agency for this project, the Planning and Development Department, per Section 15177(d) of the CEQA Guidelines, has determined that all feasible mitigation measures from MEIR No. 10130 and the Air Quality MND shall be applied to the project as conditions of approval as set forth in the attached Mitigation Monitoring Checklist (See "Master Environmental Impact Report (MEIR) No. 10130/SCH No. 2001071097 For the 2025 General Plan, Mitigation Monitoring Checklist).

Public notice has been provided regarding staff's finding in the manner prescribed by Section 15177(d) of the CEQA Guidelines and by Section 21092 of the California Public Resources Code (CEQA provisions).

Planning Manager, City of Fresno

Filed with:

FRESNO COUNTY CLERK 2221 Kern Street, Fresno, California 93721

By COUNTY LERK
DEPUTY

PROJECT DESCRIPTION: Gary Giannetta, on behalf of Gary McDonald Homes, has filed Conditional Use Permit Application No. C-08-292 and (Revised) Vesting Tentative Tract Map No. 5205 pertaining to approximately 13.07 acres of property located on the east side of the North Knotting Hill Drive, north of East Copper Avenue. Conditional Use Permit Application No. C-08-292 proposes a private street planned development. (Revised) Vesting Tentative Tract Map No. T-5205 proposes to subdivide the property into a 21 lot single-family residential subdivision. The applications are consistent with the planned land uses of medium density residential as designated by both the 2025 Fresno General Plan and the Woodward Park Community Plan.

The City of Fresno has conducted an initial study of the above-described project and it has been determined to be a subsequent project that is fully within the scope of the Master Environmental Impact Report No. 10130 (MEIR) prepared for the 2025 Fresno General Plan (SCH # 2001071097) and Mitigated Negative Declaration prepared for Plan Amendment No. A-09-02 (SCH # 2009051016) (Air Quality MND). Therefore, the Development and Resource Management Department proposes to adopt a Finding of Conformity for this project.

With the mitigation imposed, there is no substantial evidence in the record that this project may have additional significant, direct, indirect or cumulative effects on the environment that are significant and that were not identified and analyzed in the MEIR or Air Quality MND. After conducting a review of the adequacy of the MEIR and Air Quality MND pursuant to Public Resources Code, Section 21157.6(b)(1), the Development and Resource Management Department, as lead agency, finds that no substantial changes have occurred with respect to the circumstances under which the MEIR was certified and the Air Quality MND was adopted and that no new information, which was not known and could not have been known at the time that the MEIR was certified as complete and the Air Quality MND was adopted, has become available. The project is not located on a site which is included on any of the lists enumerated under Section 65962.5 of the Government Code including, but not limited to, lists of hazardous waste facilities, land designated as hazardous waste property, hazardous waste disposal sites and others, and the information in the Hazardous Waste and Substances Statement required under subdivision (f) of that Section.

Additional information on the proposed project, including the MEIR, Air Quality MND, proposed environmental finding and the initial study may be obtained from the Development and Resource Management Department,

Notice of Intent to File Finding of Conformity EA No. C-08-292/T-5205 March 18, 2011

Fresno City Hall, 2600 Fresno Street, 3rd Floor Fresno, California 93721-3604. Please contact Israel Trejo at (559) 621-8044 for more information.

ANY INTERESTED PERSON may comment on the proposed environmental finding. Comments must be in writing and must state (1) the commentor's name and address; (2) the commentor's interest in, or relationship to, the project; (3) the environmental determination being commented upon; and (4) the specific reason(s) why the proposed environmental determination should or should not be made. Any comments may be submitted at any time between the publication date of this notice and close of business on April 19, 2011. Please direct comments to Israel Trejo, Planner, City of Fresno Development and Resource Management Department, City Hall, 2600 Fresno Street, Room 3043, Fresno, California, 93721-3604; or by email to Israel.Trejo@fresno.gov; or comments can be sent by facsimile to (559) 498-1026.

**INITIAL STUDY PREPARED BY:**

### APPENDIX G TO ANALYZE SUBSEQUENT PROJECT IDENTIFIED IN MEIR NO. 10130 / MND FOR PLAN AMENDMENT A-09-02 (AIR QUALITY MND) / INITIAL STUDY

### **Environmental Checklist Form for:**

### EA No. T-5205/C-08-292

### 1. Project title:

Conditional Use Permit Application No. C-08-92 and

Major Revision to Vesting Tentative Tract Map No. 5205/UGM

### 2. Lead agency name and address:

City of Fresno
Development and Resource Management Department
2600 Fresno Street
Fresno, CA 93721

### 3. Contact person and phone number:

Israel Trejo, Planner
City of Fresno
Development & Resource Management Dept.
(559) 621-8044

### 4. Project location:

<u>Located on the east side of North Knotting Hill Drive, north of East Copper Avenue; within the boundary of the Copper River Ranch Development Project, in the City and County of Fresno, California</u>

Assessor's Parcel Number(s): 579-074-17

### 5. Project sponsor's name and address:

Highland E, LLC. 11326 North Glencastle Avenue Fresno, CA 93730

### 6. General plan designation:

The Woodward Park Community Plan and the 2025 Fresno General Plan designate the subject property for medium density residential planned land uses

### 7. Zoning:

R-1/UGM (Single Family Residential District/Urban Growth Management)

### 8. Description of project:

A 21-lot, gated single family residential subdivision to be developed at a density of 1.60 dwelling units per acre. Outlot A is proposed to be developed with private streets while Outlot B is proposed open space

### 9. Surrounding land uses and setting:

	Planned Land Use	Existing Zoning	Existing Land Use
North	Open Space / Golf Course	<b>O/UGM</b> Open Space/Urban Growth Management	Golf Course
East	Low Density and Medium Low Density Residential	R-1/UGM (pre-zoned) Single Family Residential District/Urban Growth Management	Rural Residential
South	Community Commercial	<b>C-2/UGM</b> Community Shopping Center/Urban Growth Management	Commercial
West	Open Space – Golf Course	<b>O/UGM</b> Open Space/Urban Growth Management	Golf Course

**10**. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

City of Fresno (COF) Department of Public Works; COF Department of Public Uitlities; COF Building and Safety Services Division; COF Fire Department; Fresno Metropolitan Flood Control District; and, San Joaquin Valley Air Pollution Control District.

### **ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

Pursuant to Public Resources Code Section 21157.1(b) and CEQA Guidelines 15177(b)(2), the purpose of this MEIR initial study is to analyze whether the subsequent project was described in the Master Environmental Impact Report No. 10130 and whether the subsequent project may cause any additional significant effect on the environment, which was not previously examined

in MEIR No. 10130 ("MEIR") or the Mitigated Negative Declaration prepared for Plan Amendment A-09-02 to amend the Air Quality Element of the 2025 Fresno General Plan (SCH # 2009051016) ("Air Quality MND").

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

	Aesthetics	Agriculture and Forestry Resources	Air Quality
	Biological Resources	Cultural Resources	Geology /Soils
	Greenhouse Gas Emissions	Hazards & Hazardous Materials	Hydrology/Water Quality
	Land Use/Planning	Mineral Resources	Noise
	Population /Housing	Public Services	Recreation
	Transportation/Traffic	Utilities/Service Systems	Mandatory Findings of Significance
DETER	RMINATION: (To be completed	by the Lead Agency)	
On the	basis of this initial evaluation:		
<u>X</u>	it is fully within the scope of the additional significant effects to MND such that no new acrequired. EVALUATION OF ADDITIONAL ENVIRONMENTAL IMPACTS NOT ASSESSED IN THE MEIR or Air Quality MND:

- 1. For purposes of this MEIR Initial Study, the following answers have the corresponding meanings:
  - a. "No Impact" means the subsequent project will not cause any additional significant effect related to the threshold under consideration which was not previously examined in the MEIR or Air Quality MND.
  - b. "Less Than Significant Impact" means there is an impact related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND, but that impact is less than significant;
  - c. "Less Than Significant with Mitigation Incorporation" means there is a potentially significant impact related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND, however, with the mitigation incorporated into the project, the impact is less than significant.
  - d. "Potentially Significant Impact" means there is an additional potentially significant effect related to the threshold under consideration that was not previously examined in the MEIR or Air Quality MND.
- 2. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 3. All answers must take account of the whole action involved, including off-site as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 4. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one

- or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 5. A "Finding of Conformity" is a determination based on an initial study that the proposed project is a subsequent project identified in the MEIR and that it is fully within the scope of the MEIR and Air Quality MND because it would have no additional significant effects that were not examined in the MEIR or the Air Quality MND.
- 6. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 7. Earlier analyses may be used where, pursuant to the tiering, program EIR or MIER, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a. Earlier Analysis Used. Identify and state where they are available for review.
  - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in the MEIR or another earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 8. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 9. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 10. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 11. The explanation of each issue should identify:
  - a. The significance criteria or threshold, if any, used to evaluate each question; and
  - b. The mitigation measure identified, if any, to reduce the impact to less than significance

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS Would the project:				
a) Have a substantial adverse effect on a scenic vista?				х
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				x
c) Substantially degrade the existing visual character or quality of the site and its surroundings?				х
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				Х

The subject property is vacant. Property located to the north and west has been developed as part of the Copper River Ranch Golf Course. Property to the south is developed with commercial uses. Property to the east has been approved for residential development or is planned for residential development.

The site is located within an area, which has either been developed with urban uses, or graded and prepped for development, with urban uses; therefore, no public or scenic vista will be obstructed by the development. The project site is located within an area, which has been predominantly developed with urban uses, therefore, the project will not substantially damage scenic resources, including, trees, rock outcroppings, and historic buildings within a state scenic highway. The project is proposed on vacant land and will, therefore, not substantially degrage the existing visual character or quality of the site and its surroundings. Furthermore, development of the site will not create a new source of substantial light or glare which would affect day or night time views in the project area, given that during the project review process, staff will ensure that lights are located in areas that will minimize light sources to the neighboring properties. As a result, the project will no impact on aesthetics.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
II. AGRICULTURE AND FORESTRY RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				x
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?  d) Result in the loss of forest land or				X
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				x

The subject property currently remains vacant and is located within an area, which has either been developed with urban uses, or graded and prepped for development with urban uses. The project area does not contain prime farmland, unique farmland or farmland of statewide importance and does not have a Williamson Act contract. There are no forested lands occurring within the subject area. There are no existing agricultural uses of the subject property. The project does not have the potential to facilitate future conversion of agricultural lands within the vicinity because there is no land in the vicinity used for agricultural uses.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
III. AIR QUALITY AND GLOBAL CLIMATE CHANGE - (Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.) Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?				x
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				x
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				x
d) Expose sensitive receptors to substantial pollutant concentrations?				x
e) Create objectionable odors affecting a substantial number of people?				×

The proposed project will be subject to District Rule 9510 (Indirect Source Review) and will therefore be required to submit an Air Impact Assessment (AIA) application to the District which may result in further requirements for project design elements and/or payment of applicable off-site mitigation fees.

The project will not occur at a scale or scope with potential to contribute substantially or cumulatively to existing or projected air quality violations, impacts, or increases of criteria pollutants for which the San Joaquin Valley region is under an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors). The proposed project will comply with all applicable air quality plans. Therefore, no violations of air quality standards will occur and no net increase of pollutants will occur. The proposed use is allowed on the subject site and will not expose sensitive receptors to substantial pollutant concentrations. The proposed project is not proposing a use which will create objectionable odors.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
IV. BIOLOGICAL RESOURCES Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				X
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				X
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				X
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

The proposed project would not affect any sensitive, special status, or candidate species, nor would it modify any habitat that supports them. There is no riparian habitat or any other sensitive natural community identified in the vicinity of the proposed project by the California Department of Fish and Game or the US Fish and Wildlife Service. No federally protected

wetlands are located on the subject site. Therefore, there would be no impacts to species, riparian habitat or other sensitive communities and wetlands. The proposed project would have no impact on the movement of migratory fish or wildlife species or on established wildlife corridors or wildlife nursery sites. No local policies regarding biological resources are applicable to the subject site and there would be no impacts with regard to those plans. No habitat conservation plans or natural community conservation plans in the region pertain to natural resources, which exist on the subject site or in its immediate vicinity.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
V. CULTURAL RESOURCES Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource as defined in '15064.5?				Х
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to '15064.5?				Х
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				Х
d) Disturb any human remains, including those interred outside of formal cemeteries?				Х

There are no structures which exist on or within the immediate vicinity of the site that are listed on, or considered to be eligible to the National or Local Register of Historic Places. There is no evidence that cultural resources of any type (including historical, archaeological, paleontological, or unique geologic features) exist on the subject property. Past record searches for the region have not revealed the likelihood of cultural resources on the subject property or in its immediate vicinity. Therefore, it is not expected that the proposed project may impact cultural resources. It should be noted however that lack of surface evidence of historical resources does not preclude the subsurface existence of archaeological resources. Therefore, due to the ground disturbing activities that will occur as a result of the project, the measures within the Master Environmental Impact Report No. 10130/SCH No. 2001071097 for the 2025 Fresno General Plan, Mitigation Monitoring Checklist to address archaeological resources, paleontological resources, and human remains will be employed to guarantee that should archaeological and/or animal fossil material be encountered during project excavations, then work shall stop immediately; and, that qualified professionals in the respective field are contacted and consulted in order to insure that the activities of the proposed project will not involve physical demolition, destruction, relocation, or alteration of historic, archaeological, or paleontological resources.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VI. GEOLOGY AND SOILS Would the project:				
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				×
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?				X
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
b) Result in substantial soil erosion or the loss of topsoil?				X
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				X
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				X
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				×

Fresno has no known active earthquake faults, and is not in any Alquist-Priolo Special Studies Zones. There are no known geologic hazards or unstable soil conditions known to exist on the site. Development of the property requires compliance with grading and drainage standards of the City of Fresno and Fresno Metropolitan Flood Control District Standards. The drainage in the subject area flows from east to west. In order to provide surface drainage and major storm conveyance from the properties to the east (APNs 579-074-30 and 579-074-33), the Fresno Metropolitan Flood Control District (FMFCD) recommends a stub street to the

east between proposed lots 9 and 10. If the stub street is not constructed, then the developer of the subject application shall provide for surface drainage of storm water in the form of an improved channel. All new structures are required to conform to current seismic protection standards in the California Building Code.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VII. GREENHOUSE GAS EMISSIONS Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				X
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?				x

The proposed project will not occur at a scale or scope with potential to contribute substantially or cumulatively to the generation of greenhouse gas emissions, either directly or indirectly. Under the MEIR and General Plan mitigation measures and policies for reducing all forms of air pollution, levels of greenhouse gases will be reduced along with other regulated air pollutants. At this point in time, detailed analyses and conclusions as to the significance of greenhouse gas emissions and strategies for mitigation are still not feasible, because the legislatively-mandated greenhouse gas inventory benchmarking and the environmental analysis policy formulation tasks are not completed.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VIII. HAZARDS AND HAZARDOUS MATERIAL Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				Х
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?				Х

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				X
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				Х
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				Х
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				X
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				X

The project itself will not generate or use hazardous materials. There are no known existing hazardous material conditions on the site and the project is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. The project is not located within an airport land use plan or within two miles of a public airport, nor is it located within the vicinity of a private airstrip. The project poses no interference with the City's or County's Hazard Mitigation Plans or emergency response plans. The project is not located within a wildland area and will, therefore, not expose people or structures to significant risk of loss, injury or death involving wildland fires.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
IX. HYDROLOGY AND WATER QUALITY Would the project:				
a) Violate any water quality standards or waste discharge requirements?				Х
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				X
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?			X	
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?				X
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				Х
f) Otherwise substantially degrade water quality?				X
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				×
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				X
j) Inundation by seiche, tsunami, or mudflow?				Х

Fresno is one of the largest cities in the United States still relying primarily on groundwater for its public water supply. Surface water treatment and distribution has been implemented in the northeastern part of the City, but the city is still subject to an EPA Sole Source Aquifer designation. While the aquifer underlying Fresno typically exceeds a depth of 300 feet and is capacious enough to provide adequate quantities of safe drinking water to the metropolitan area well into the twenty-first century, groundwater degradation, increasingly stringent water quality regulations, and an historic trend of high consumptive use of water on a per capita basis (some 250 gallons per day per capita), have resulted in a general decline in aquifer levels, increased cost to provide potable water, and localized water supply limitations.

Fresno has attempted to address these issues through metering and revisions to the City's Urban Water Management Plan (UWMP). The Fresno Metropolitan Water Resource Management Plan, which has been adopted and the accompanying Final EIR (SCH #95022029) certified, is also under revision. The purpose of these management plans is to provide safe, adequate, and dependable water supplies in order to meet the future needs of the metropolitan area in an economical manner; protect groundwater quality from further degradation and overdraft; and, provide a plan of reasonably implementable measures and facilities. City water wells, pump stations, recharge facilities, water treatment and distribution systems have been expanded incrementally to mitigate increased water demands and respond to groundwater quality challenges.

In accordance with the provisions of the 2025 Fresno General Plan and Master EIR No. 10130 mitigation measures, project specific water supply and distribution requirements must assure that an adequate source of water is available to serve the project. The City has indicated that groundwater wells, pump stations, recharge facilities, water treatment and distribution systems shall be expanded incrementally to mitigate increased water demands. The City of Fresno Department of Public Utilities, Water Division has reviewed the proposed project and has determined that water service will be available to the proposed project subject to compliance with The Department of Public Works standards, specifications, and policies.

There is no stream or river in the subject area. Development of the property requires compliance with grading and drainage standards of the City of Fresno and FMFCD. The drainage in the subject area flows from east to west. In order to provide surface drainage and major storm conveyance from the properties to the east, the FMFCD recommends a stub street to the east between proposed lots 9 and 10. If the stub street is not constructed, then the developer of the subject application shall provide for surface drainage of storm water in the form

of an improved channel. The project will not substantially alter existing drainage patterns of the site or area or substantially increase the rate or amount of runoff in a manner which would result in flooding, exceed planned storm water drainage systems, or provide substantial sources of polluted runoff.

The site is not located within a flood prone or hazard area. The subject property is proposed to be developed at an intensity and scale permitted by the planned land use and proposed zoning designation for the site.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
X. LAND USE AND PLANNING - Would the project:				
a) Physically divide an established community?				X
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?				×

The project proposes to develop 21 lots within a developing community and will not conflict with any applicable land use plan, policy or regulation of the City of Fresno. The proposed project is consistent with the applicable 2025 Fresno General Plan and Woodward Park Community Plan planned land use designation. The project will not conflict with any conservation plans since it is not located within any conservation plan areas.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XI. MINERAL RESOURCES Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				×

The subject property is not located in an area designated for mineral resource preservation or recovery.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XII. NOISE Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				X
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?				X
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				Х
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?				×
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				x

The project will not expose people to noise levels in excess of standards established in the general plan because there are no significant noise generators nearby. Additionally, a residential development is not a significant noise generator. Construction activities associated with the development of the proposed project could expose persons or structures to excessive groundborne vibration or noise levels. However, this would only be during the construction phase of the proposed project. The proposed project is not located within an airport land use plan or within the vicinity of a private airstrip. The project will be required to comply with all noise policies from the 2025 Fresno General Plan and noise codes from the Fresno Municipal Code.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIII. POPULATION AND HOUSING Would the project:				
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				Х
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				Х
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				Х

Although the project will be intensifying the use of the currently undeveloped site, development may occur at an intensity and scale that is permitted by the planned land use designation and proposed zone district classification for the site. Thus, the subdivision of the subject property in accordance with the subject applications will not facilitate an additional intensification of uses beyond that which would be allowed by the above-noted planned land use designation. The subject property is vacant and will, therefore, not displace existing housing or people.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIV. PUBLIC SERVICES				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?				X
Police protection?				X
Drainage and flood control?			Х	
Parks?				Х
Schools?				Х
Other public services?				X

The Department of Public Utilities has reviewed the proposed project and have determined that adequate sewer, water, and solid waste facilities are available subject to compliance with the conditions submitted by the Department of Public Utilities for this project. City police and fire protection services are also available to serve the proposed project. The FMFCD has indicated that there are adequate facilities to serve the proposed project subject to compliance with the conditions submitted by the District for the proposed project. Development of the property requires compliance with grading and drainage standards of the City of Fresno and FMFCD. The drainage of the subject area flows from east to west. In order to provide surface drainage and major storm conveyance from the properties to the east, the FMFCD recommends a stub street to the east between proposed lots 9 and 10. If the stub street is not constructed, then the developer of the subject application shall provide for surface drainage of storm water in the form of an improved channel.

The above noted departments and agencies have all submitted conditions that will be required as Conditions of Approval for the subject entitlement applications (conditional use permit and tract map). These conditions of approval will ensure that the proposed project will have a less than significant impact to urban services. All conditions of approval must be complied with prior to occupancy.

The demand for parks generated by the project is within planned services levels of the City of Fresno Parks and Community Services Department and the applicant will pay any required impact fees at the time building permits are pulled.

Any urban residential development occurring as a result of the proposed project will have an impact on the District's student housing capacity. The developer will pay appropriate school fees at time of building permits.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XV. RECREATION				
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				Х
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

The project is proposed at a size and scope (21 lots) which will not result in the physical deterioration of existing parks or recreational facilities. The project does not include recreational

facilities. The project does not require expansion of existing recreational facilities.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVI. TRANSPORTATION/TRAFFIC Would the project:				
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths and mass transit?				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Conflict with an applicable congestion management program, including but not limited to level of service standards and travel demand measures or other standards established by the county congestion management agency for designated roads or highways?				X
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that result in substantial safety risks?				×
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				X
e) Result in inadequate emergency access?				X
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?				X

The Public Works Department/Traffic Engineering Division staff has reviewed the proposed traffic yield from the proposed single family residential planned development and the expected traffic generation will not adversely impact the existing and projected circulation system as analyzed in MEIR No. 10130. Furthermore, the design of the proposed subdivision has been evaluated and determined to be consistent with respect to connectivity and compliance with City of Fresno standards, specification and policies. The project is not located near an airport, therefore it will not change air traffic levels. The proposed streets were reviewed by the Department of Public Works and will not create hazards. The second point of access to serve the subject site is provided through Vesting Tentative Tract Map. No. 5903/UGM, which location was approved by the Fire Department. The project will not conflict with adopted policies or plans regarding public transit, bicycle or pedestrian facilities.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVII. UTILITIES AND SERVICE SYSTEMS Would the project:				

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				Х
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				Х
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				Х
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				X
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				Х
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				Х
g) Comply with federal, state, and local statutes and regulations related to solid waste?				X

The Department of Public Utilities has determined that adequate sanitary sewer and water services will be available to serve the proposed project subject to the provision and construction of standard connections, extensions, and installations of facility infrastructure; compliance with the Department of Public Utilities standards, specifications, and policies. The project site will be serviced by the Solid Waste Division and have water and sewer facilities available subject to conditions. The Fresno Metropolitan Flood Control District has indicated that there are adequate facilities to serve the proposed project subject to compliance with the conditions submitted by the District for the proposed project. The proposed project is not expected to exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVIII. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				X
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				X
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				×

The proposed project is considered to be proposed at a size and scope which is neither a direct or indirect detriment to the quality of the environment through reductions in habitat, populations, or examples of local history (through either individual or cumulative impacts).

The proposed project does not have the potential to degrade the quality of the environment or reduce the habitat of wildlife species and will not threaten plant communities or endanger any floral or faunal species. Furthermore the project has no potential to eliminate important examples of major periods in history.

Therefore, as noted in preceding sections of this Initial Study, there is no evidence in the record to indicate that incremental environmental impacts facilitated by this project would be cumulatively significant. There is also no evidence in the record that the proposed project would have any adverse impacts directly, or indirectly, on human beings.

#### **EXHIBIT C**

#### MASTER ENVIRONMENTAL IMPACT REPORT (MEIR) REVIEW SUMMARY

Projected Population and Housing. The City of Fresno experienced a period of notable growth in the construction of single family residences over the first five-year period of the 2025 Fresno General Plan (2003 through 2007). However, this development has occurred within the parameters anticipated by the General Plan and the mitigation measures established by Master Environmental Impact Report (MEIR 10130/SCH 2001071097). The General Plan and its MEIR utilized a projected population growth rate for purposes of land use and resource planning. This projection anticipated an annual average population growth of approximately 1.9 percent over the 23-year planning period. Population estimates provided by the State of California Department of Finance (DOF) indicate a population growth of approximately 60, 000 people between 2002 and 2007 with a growth rate varying from 1.47 to 1.97 percent per year. These estimates are well within the growth projections of the General Plan and MEIR.

The City has processed approximately 110 plan amendment applications since the adoption of the 2025 Fresno General Plan. These applications have resulted in changes of planned land use that affected approximately 1,000 acres, representing approximately one percent of the land area within the 2025 Fresno General Plan boundary. The impacts of these amendments are minimal and not significant in relation to the balance of the density and intensity of the land uses impacted by the plan amendment applications.

Based upon this, many of the assumptions relied upon for the MEIR to address other impacts, such as traffic, air quality, need for public utilities, services and facilities and water supplies are still valid to the extent that these assumptions relied upon projected population growth during the General Plan planning period. For this reason and the others provided below, the Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known pursuant to CEQA Guideline Section 15179(b)(1) and the MEIR may still be relied upon.

Transportation and Circulation. Subsequent to the certification of the MEIR the City of Fresno has required the preparation of approximately 200 site specific traffic impact studies and had required the provision of street, intersection signalization and transportation improvements in accordance with the adopted mitigation measures of the MEIR. The City's Traffic Engineer reports that through review of these approximately 200 traffic impact studies, the City has not seen traffic counts substantially different than those predicted by the MEIR. Concurrently with these efforts, the City adopted a new program for traffic signal and major street impact fees to pay for planned improvements throughout Fresno (not just in new growth areas, as has been the case with the previous impact fee program). These fees will more comprehensively provide for meeting transportation infrastructure needs and will expedite reimbursement for developments, which construct improvements that exceed the project's proportionate share of the corresponding traffic or transportation capacity needs.

In addition to the local street system, the City has entered into an agreement with the California Department of Transportation to collect impact fees for state highway facilities which may be impacted by new development projects. The City participates in the Fresno County

Page 2

Transportation Authority, which recently was successful in obtaining voter re-authorization of a half-cent sales tax to be dedicated to a wide range of transportation facilities and programs (including mass transit). The City is also an active participant in ongoing regional transportation planning efforts, such as a freeway deficiency study, a corridor study for one or more additional San Joaquin River crossings, and the State's "Blueprint for the Valley" process. All these studies were commenced after the MEIR was certified, but none of them is yet completed. Therefore, it cannot be concluded that Fresno's environmental setting or the MEIR analysis of traffic and circulation have materially changed since November of 2002.

Therefore, Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon traffic impacts pursuant to CEQA Guideline Section 15179(b)(1).

Air Quality and Global Climate Change Staff has worked closely with the regional San Joaquin Valley Air Pollution Control District (SJVAPCD) since the November 2002 certification of the 2025 Fresno General Plan Master Environmental Impact Report (MEIR). Potential air quality impacts have been analyzed for every environmental assessment initial study done for City development projects. Projects are required to comply with SJVAPCD rules and regulations via conditions of approval and mitigation measures formulated in the MEIR.

Overall, revisitation of these issues leads to the conclusion that, while there have been changes in air quality laws, planning requirements, and rules and regulations since certification of the MEIR, the actual environmental setting has not evidenced degradation of air quality. (Because air quality and global climate change are matters of some public controversy, additional documentation has been supplied on this issue; please refer to the appended full analysis with supporting data.)

In conjunction with SJVAPCD attainment plans and attendant rules and regulations that were adopted prior to the certification of the MEIR, policies in the 2025 Fresno General Plan and MEIR mitigation measures aimed at improving air quality appear to be working. Since 2002, data show that pollutant levels have been steadily decreasing for ozone/oxidants and for particulate matter (10 microns and 2 microns in size). Recent adoption of new air quality attainment plans by SJVAPCD, calling for broader and more stringent rules and regulations to achieve compliance with national and state standards, is expected to accelerate progress toward attainment of clean air act standards.

Analysis of global climate change analysis was not part of the MEIR in 2002, due to lack of scientific consensus on the matter and a lack of analytical tools. However, under the MEIR and General Plan mitigation measures and policies for reducing all forms of air pollution, levels of greenhouse gases have been reduced along with the other regulated air pollutants. At this point in time, detailed analysis and conclusions as to the significance of greenhouse gas emissions and strategies for mitigation are still not feasible, because the legislatively-mandated greenhouse gas inventory benchmarking and the environmental analysis policy formulation tasks of the California Environmental Protection Agency Air Resources Board and the Governor's Office of Planning and research are not completed. The information available does not support any conclusion that Conditional Use Permit No. C-08-292 and the Major Revision to Vesting Tentative Tract Map No. T-5205/UGM or other City projects would have a significantly adverse impact on global climate change. Similarly, there is insufficient information to conclude that global climate change would have a significantly adverse impact upon the City of Fresno or specific development projects.

Page 3

Staff is not aware of any particular circumstance or information that would make impacts to air quality a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Therefore, Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon air quality impacts pursuant to CEQA Guideline Section 15179(b)(1).

Water Supply, Quality and Hydrology. The City of Fresno has initiated, continued and completed numerous projects addressing general plan and MEIR provisions relating maintaining an adequate supply of safe drinking water to serve present and future projected needs. A water meter retrofit program to meter service to all consumers by the end of the year 2012 is underway, in compliance with State law that predated the MEIR and with new regulations affecting the U.S. Bureau of Reclamation Central Valley Project. (While the federal regulation has trumped a voter-approved City charter amendment that specifically prohibited using meters for residential development, the City's plans and policies have always contained measures calling for water conservation and for seeking ways to reduce average consumption of households. Metering is recognized as the best implementation measure for this, and does not constitute a change in the City's environmental setting or the analysis and mitigation in the 2025 Fresno General Plan MEIR.) After certification of the MEIR, the City commenced operation of its northeast area surface water treatment facility; initiated and began construction of additional groundwater wells with granular activated carbon filtration systems as necessary to remediate groundwater contamination that was discussed in the MEIR and its mitigation measures; provided for additional groundwater recharge areas; and expanded its network of water transmission main pipeline improvements allowing for improved distribution of water supply.

As called for in 2025 General Plan policies and MEIR mitigation measures, the City has implemented several programs for preventing water pollution: In conjunction with Fresno Metropolitan Flood Control District and the Regional Water Quality Control Board (RWQCB) City inspectors assist in enforcing the National Pollutant Discharge Elimination System Stormwater Pollution Prevention regulations, The Planning and Development Department also consults with RWQCB on specific development projects which may require on-site wastewater treatment, and provides project-specific conditions and even supplemental environmental analysis for such projects, with specific mitigation measures. The City's Department of Public Utilities has enhanced its industrial pretreatment permitting program for industrial wastewater generators who discharge to the Fresno-Clovis Wastewater Treatment and Reclamation Facility.

Staff is not aware of any particular circumstance or information that would make impacts to water supply, quality and hydrology a reasonably foreseeable impact or more severe impact from that identified in the MEIR. The Director of Public Utilities finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known based upon traffic impacts pursuant to CEQA Guideline Section 15179(b)(1).

Agricultural Resources. The implementation of applicable policies since adoption of the 2025 Fresno General Plan has encouraged the development of urban uses in a more systematic pattern that avoids discontinuity and the creation of vacant by-passed properties. These efforts, together with the requirement to record "right-to-farm" covenants, facilitate the continuation of existing agricultural uses within the city's planned urban growth boundary during the interim period preceding orderly development of the property as anticipated by the General Plan. Staff is not aware of any particular circumstance or information that would make impacts from loss of agricultural resources a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the

Page 4

MEIR was certified and/or new information is not known related to loss of agricultural resources pursuant to CEQA Guideline Section 15179(b)(1).

Demand for Utilities and Service Systems. The City of Fresno has continued to provide for utilities and service systems commensurate with the demands of increased population and employment within its service area, implementing policies of the 2025 Fresno General Plan and conforming to MEIR mitigation measures. Programmatic measures have been continued, expanded or initiated to increase the efficiencies of providing services in a manner that will reduce potential impacts upon the natural and human environment. These improvements have included bringing the City's first surface water treatment plant on-line to distribute treated surface water, thereby preventing a worsening of groundwater overdraft in northeast Fresno; converting a substantial portion of the City's service vehicle fleet to alternative fuels; and expanding recycling and conservation measures (including contracting with a major material sorting and recycling facility and a green waste processor to comply with AB 939 solid waste reduction mandates) to more judiciously use resources and minimize adverse impacts the environment. Adoption of City-wide police and fire facility development impact fees and a contract to consolidate fire service with an adjacent fire prevention district have been accomplished to assure the provision of adequate firefighting capacity to serve a broader geographic extend of urban development and more intensive and mixed-use development throughout the metropolitan area.

Because these changes were anticipated in, or provided for by, the 2025 Fresno General Plan and its MEIR mitigation measures, they do not constitute a significant or adverse alteration of Fresno's environmental setting. Staff is not aware of any particular circumstance or information that would make impacts from increased demand for utilities and service systems and public facilities a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to increased demand for utilities, service systems, and public facilities pursuant to CEQA Guideline Section 15179(b)(1).

<u>Demand for Recreational Facilities</u>. The City of Fresno has adopted and City-wide parks facility and Quimby Act fee which provides for the acquisition of new open space and recreation facilities as well as improvements to existing facilities and programs to provide a broader range of recreation opportunities. Staff is not aware of any particular circumstance or information that would make impacts from increased demand for recreational facilities a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to increased demand for utilities, service systems, and public facilities pursuant to CEQA Guideline Section 15179(b)(1).

Biological Resources. The City continues to evaluate all development proposals for potential impacts upon natural habitats and associated species dependent upon these habitats. The City supports continuing efforts to acquire the most prominent habitats where appropriate, such as portions of the San Joaquin River environs. When development or public works projects have been proposed in this area, they have been subject to site-specific evaluation through supplemental environmental analyses, and appropriate mitigation measures and conditions applied as derived from consultation with the U.S. Fish and Wildlife Service and the California Department of Fish and Game. The City has imposed MEIR mitigation measures related to Biological Resources on projects that identified potential impacts to biological resources. Staff finds that this has adequately addressed any potential impact to biological resources. Staff is not aware of any particular circumstance or information that would make impacts from loss of

Page 5

biological resources a reasonably foreseeable impact or more severe impact from that identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of biological resources pursuant to CEQA Guideline Section 15179(b)(1).

<u>Potential Disturbance of Cultural Resources</u>. The City of Fresno has implemented numerous efforts to identify historic and cultural resources, and provide thorough consideration as to their value and contributions to understanding or historic and cultural heritage.

Additionally, staff follows the MEIR mitigation measures for potential cultural resources. Staff is not aware of any particular circumstance or information that would make impacts to cultural resources a reasonably foreseeable impact that was not identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of cultural resources pursuant to CEQA Guideline Section 15179(b)(1).

Within the last five years, the City has lost two lawsuits (Valley Advocates v. COF and Heritage Fresno v. RDA, City of Fresno) related to historical resources that related to six particular buildings at two different particular sites. The CEQA projects at issue were reviewed under independent CEQA documents, not under the MEIR as subsequent projects (*i.e.*, one under a separate EIR and one under a categorical exemption). These projects are site specific and are not reasonably expected to create additional impacts to cultural resources that would affect a finding under Section 15179. These particular projects may be properly assessed under the MEIR focused EIR procedures or mitigated negative declaration procedures under Section 15178 and not affect the overall MEIR findings.

Generation of Noise. The City of Fresno continues to implement mitigation measures and applicable plan policies to reduce the level of noise to which sensitive noise receptors are exposed. These efforts include identification of high noise exposure areas, limiting the development of new noise sensitive uses within these identified areas and conducting noise exposure studies and requiring implementation of appropriate design measures to reduce noise exposure. Staff finds that these efforts have adequately addressed any potential impacts that may have arisen related to noise and is not aware of any facts or circumstance that would make noise impacts have a more severe impact than that identified in the MEIR. Additionally, staff is not aware of any information or data that was not known at the time that the MEIR was certified that would be able to mitigate noise impacts beyond that identified and contemplated by the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to noise impacts pursuant to CEQA Guideline Section 15179(b)(1).

Geology and Soils. The City of Fresno has a predominantly flat terrain with few geologic or soil quality constraints. The City continues to apply applicable local and state construction codes and standards and continues to adopt new standards as appropriate to insure the safety of residents and protection of property improvements.

Staff finds that these codes and standards have adequately addressed any potential impacts that may have arisen related to geology and soils and is not aware of any facts or circumstance that would make impacts related to geology and soils a reasonably foreseeable impact not addressed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known regarding impacts related to geology and soils pursuant to CEQA Guideline Section 15179(b)(1).

Hazards and Potential Generation of Hazardous Materials The City continues to implement General Plan policies and assure compliance with MEIR mitigation measures as new development is planned and constructed, and as Code Enforcement activities are conducted, in order to prevent flood damage, structural failures due to soil and geologic instability, and wildfire losses. Development in the vicinity of airports has been reviewed and appropriately conditioned with regard to adopted and updated airport safety and noise policies. In consultation with Fresno County Environmental Health and the California Environmental Protection Agency Department of Toxic Substances Control, industrial and commercial facilities that use, handle, or store potentially hazardous materials are appropriately sited, conditioned, and inspected periodically by the Fresno Fire Department to prevent adverse occurrences. Homeland Security regulations have been taken into consideration when reviewing food production, processing and storage facilities, and the City has conducted and participated in multiple emergency response exercises to develop response plans that would protect life, health, and safety in the event of railroad accidents and other potential hazards.

Staff finds that these procedures, as outlined in the 2025 Fresno General Plan and its MEIR (as well as in related regulations and codes pertaining to hazards and hazardous materials) have adequately addressed potential impacts that may have arisen related to hazards. Staff is not aware of any facts or circumstance that would make impacts related to hazards and hazardous materials reasonably foreseeable impacts not addressed in the MEIR. Staff finds that the circumstances have not materially changed from the time the MEIR was certified and/or new information is not known related to impacts from hazards and hazardous materials pursuant to CEQA Guideline Section 15179(b)(1).

<u>Demand for Energy</u>. The City of Fresno has taken a number of steps to reduce energy consumption, both "in house" to set an example, and in the policy arena. The most notable "inhouse" actions are the following:

- Construction of solar panel generator facilities at the Municipal Services Center (MSC) and at Fresno-Yosemite International Airport. The MSC facility, completed_ in 2004, generates 3.05 GWt of energy (equivalent to operation of 286 homes per year) and has resulted in reduction of 966 tons of CO₂ emissions (equivalent to 2,414,877 vehicular miles not driven).
- Replacement of a significant number of vehicles in the municipal fleet with clean air vehicles (please refer to the following table).

#### **CURRENT CITY OF FRESNO "CLEAN AIR" FLEET**

50	CNG Transit Buses
4	CNG Trolleys
6	CNG Handi-Ride Buses
59	Retrofitted Diesel Powered Buses with REV (reduced emission vehicle) engines and diesel particulate traps

2	Hybrid (gasoline-electric) Transit Buses
2	Hybrid (diesel-electric) Transit Buses
12	Compressed Natural Gas (CNG) Pickups, Vans and Sedans
7	Flex Fuel Pickups, Vans and Sedans (CNG/Unleaded Fuel)
3	Compressed Natural Gas (CNG) Street Sweepers
52	Hybrid (gasoline-electric) Sedans and Trucks
34	Electric Vehicles
5	Propane Powered Vehicles
103	LNG Powered Refuse Trucks
59	Retrofitted Diesel Powered Refuse Trucks with combination lean NOx catalyst and diesel particulate filters
9	Retrofitted Diesel Powered Street Sweepers with combination lean NOx catalyst and diesel particulate filters
1	Plug-In CNG/Electric Hybrid Refuse Truck
56	Heavy duty diesel trucks and construction equipment equipped with exhaust after-treatment devices
9	Off Road Equipment with exhaust after-treatment devices
473	Total "Clean Air" Vehicles in the City of Fresno fleet

In the development standards policy arena, the City is taking numerous steps to increase residential densities and connectivity between residential and commercial land uses, thus facilitating more walking, biking and transit ridership (which has increased 22% in recent months) and saving energy:

- Amended the zoning code to allow development of mixed use projects in all commercial zone districts citywide, and in the C-M and M-1 zone districts within the Central Area.
- Amended the zoning code to allow density bonuses for affordable housing projects. Such bonuses permit density increases of approximately 30%.
- Amended zoning code to eliminate the "drop down" provision, which permitted development at one density range less than that shown on the adopted land use map.

Page 8

- Amended the zoning code to increase heights in various residential and commercial zone districts and reduce the minimum lot size in the R-1 zone district from 6,000 to 5,000 square feet.
- Initiated the Activity Center Study, which is defining the potential Activity Centers located in Exhibit 6 of the 2025 Fresno General Plan and proposing design classifications and increased density ranges for these centers and corresponding transportation corridors.

Staff is not aware of any facts or circumstance that would make impacts related to energy demands reasonably foreseeable impacts that were not addressed in the MEIR. Staff finds that the circumstances have not materially changed from the time the MEIR was certified and/or new information is not known related to energy demand impacts pursuant to CEQA Guideline Section 15179(b)(1).

Mineral Resources. The City of Fresno has adopted plan policies and City ordinance provisions consistent with requirements of the State of California necessary to preserve access to areas of identified resources and for restoration of land after resource recovery (surface mining) activities. Staff finds that these policies and Fresno Municipal Code provisions have adequately addressed any potential impacts that may have arisen related to mineral resources and is not aware of any facts or circumstance that would make loss of mineral resources a reasonably foreseeable impact not addressed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to loss of mineral resources pursuant to CEQA Guideline Section 15179(b)(1).

School Facilities. The City of Fresno continues to consult with affected school districts and participate in school site planning efforts to assure the identification of appropriate location alternatives for planned school facilities. Staff is not aware of any information from the school districts or otherwise to demonstrate that adequate school facilities are not being accommodated under the current General Plan and/or that the need for school facilities is expected to cause impacts not identified in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related to need for school facilities pursuant to CEQA Guideline Section 15179(b)(1).

Potential Aesthetic Impacts. Design Guidelines were appended to the 2025 Fresno General Plan through the plan adoption process conducted concurrently with MEIR analysis. As noted previously, General Plan policies encourage and promote infill development, and the City of Fresno Planning and Development Department has implemented design guidelines for reviewing infill housing development proposals. The Department has prepared detailed design guidelines for the Tower District Specific Plan area and the Fulton-Lowell Specific Plan area, both of which contain enclaves of unique structures. The City has adopted policies promoting incorporation of public art within private development projects, which will contribute to a more appealing visual environment, benefitting users of the private property as well as the surrounding community. In addition, the City of Fresno and the City of Fresno Redevelopment Agency have funded public improvements which improve the general aesthetic. Staff is not aware of any situation or circumstances where there are reasonably foreseeable aesthetic impacts not identified and assessed in the MEIR. Staff finds that the circumstances have not changed from the time the MEIR was certified and/or new information is not known related aesthetic impacts pursuant to CEQA Guideline Section 15179(b)(1).

Appendix: Status of MEIR Analysis With Regard to Air Quality and Climate Change

#### **APPENDIX**

#### STATUS OF MEIR ANALYSIS WITH REGARD TO AIR QUALITY AND CLIMATE CHANGE

#### **EXECUTIVE SUMMARY**

Planning staff has worked closely with the regional San Joaquin Valley Air Pollution Control District (SJVAPCD) since the November 2002 certification of the 2025 Fresno General Plan Master Environmental Impact Report (MEIR). Potential air quality impacts have been analyzed for every environmental assessment initial study done for City development projects. Projects are required to comply with SJVAPCD rules and regulations via conditions of approval and mitigation measures formulated in the MEIR.

Overall, revisitation of these issues leads to the conclusion that, while there have been changes in air quality laws, planning requirements, and rules and regulations since certification of the MEIR, the actual environmental setting has not evidenced degradation of air quality. In conjunction with SJVAPCD attainment plans and attendant rules and regulations that were adopted prior to the certification of the MEIR, policies in the 2025 Fresno General Plan and MEIR mitigation measures aimed at improving air quality appear to be working. Since 2002, data show that pollutant levels have been steadily decreasing for ozone/oxidants and for particulate matter (10 microns and 2 microns in size). Recent adoption of new air quality attainment plans by SJVAPCD, calling for broader and more stringent rules and regulations to achieve compliance with national and state standards, is expected to accelerate progress toward attainment of clean air act standards.

Analysis of global climate change analysis was not part of the MEIR in 2002, due to lack of scientific consensus on the matter and a lack of analytical tools. However, under the MEIR and General Plan mitigation measures and policies for reducing all forms of air pollution, levels of greenhouse gases have been reduced along with the other regulated air pollutants. At this point in time, detailed analysis and conclusions as to the significance of greenhouse gas emissions and strategies for mitigation are still not feasible, because the legislatively-mandated greenhouse gas inventory benchmarking and the environmental analysis policy formulation tasks of the California Environmental Protection Agency Air Resources Board and the Governor's Office of Planning and research are not completed. The information available does not support any conclusion that Conditional Use Permit No. C-08-292 and the Major Revision to Vesting Tentative Tract Map No. T-5205/UGM or other City projects would have a significantly adverse impact on global climate change. Similarly, there is insufficient information to conclude that global climate change would have a significantly adverse impact upon the City of Fresno or specific development projects.

#### SUPPORTING DATA AND ANALYSIS

While there have been changes in air quality regulations since the November 2002 certification of the 2025 Fresno General Plan MEIR, the actual environmental setting has not evidenced degradation of air quality.

The adverse air quality impacts associated with the myriad of human activities potentiated by the long range general plan for the Fresno metropolitan area can be expected to remain

Page 10

significant and unavoidable, and cannot be completely mitigated through the General Plan or through project-level mitigation measures. In order to provide a suitable living environment within the metropolitan area, the General Plan and its MEIR included numerous air pollution reduction measures.

The 2025 Fresno General Plan and its MEIR gave emphasis to pursuing cleaner air as an overarching goal. The urban form element of the General Plan was designed to foster efficient transportation and to support mass transit and subdivision design standards are being implemented to support pedestrian travel. Strong policy direction in the Public Facilities and Resource Conservation elements require that air pollution improvement be a primary consideration for all land development proposals, that development and public facility projects conform to the 2025 Fresno General Plan and its EIR mitigation measures, and that the City work conjunctively with other agencies toward the goal of improving air quality.

The MEIR mitigation checklist sketched out a series of actions for the City to pursue with regard to its own operations, and City departments are pursuing these objectives. The Fresno Area Express (FAX) bus fleet and the Department of Public Utilities solid waste collection truck fleet are being converted to cleaner fuels. Lighter-duty vehicle fleets are also incorporating alternative fuels and "hybrid" vehicles. Mass transit system improvements are supporting increased ridership. Construction of sidewalks, paseos, bicycle lanes and bike paths is being required for new development projects, and are being incorporated into already-built segments of City rights-of-way with financing from grants, gas tax, and other road construction revenues. Traffic signal synchronization is being implemented. The Planning and Development Department amended the Fresno Municipal Code to ban all types of residential woodburning appliances, thereby removing the most prominent source of particulate matter pollution from new construction.

Pursuant to a specific MEIR mitigation measure, all proposed development projects are evaluated with the "Urbemis" air quality impact model that evaluates potential generation of a range of air pollutants and pollutant precursors from project construction, project-related traffic, and from various area-wide non-point air pollution sources (e.g., combustion appliances, yard maintenance activities, etc.). The results of this "Urbemis" model evaluation are used to determine the significance of development projects' air quality impacts as well as the basis for any project-specific air quality mitigation measures.

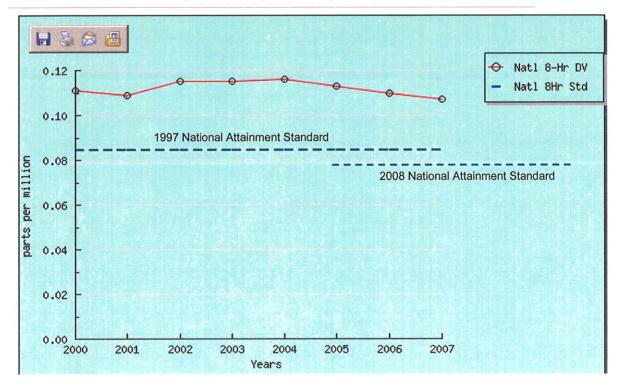

There are no new (*i.e.*, unforeseen in the MEIR) reasonable mitigation measures which have become available since late 2002 that would assure the reduction of cumulative (city-wide) air quality impacts to a less than significant level at project buildout, even with full compliance with attainment plans and rules promulgated by the California Air Resources Board and the San Joaquin Valley Air Pollution Control District.

Through implementation of regional air quality attainment plans by the San Joaquin Valley Unified Air Pollution Control District (SJVAPCD), as supported by implementation of 2025 Fresno General Plan policies and MEIR mitigation measures, air pollution indices have shown improvement. Progress is being made toward attainment of federal and state ambient air quality standards.

Ozone/oxidant levels have shown gradual improvement, as depicted in the following graphs and charts from the California Air Resources Board (graphics with an aqua background) and from the San Joaquin Valley Air Pollution Control District (those with no background color):

#### O Air Resources Board

#### Ozone Trends Summary: San Joaquin Valley Air Basin

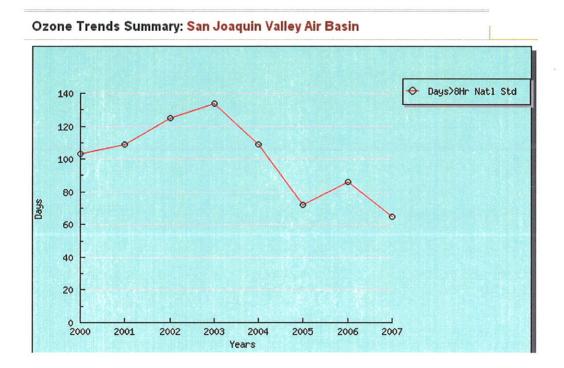

GRAPH NOTES: The "National 1997 8-Hour Ozone Design Value" is a three-year running average of the fourth-highest 8-hour ozone measurement averages in each of the three years (computed according to the method specified in Title 40, Code of Federal Regulations, Part 50, Appendix I).

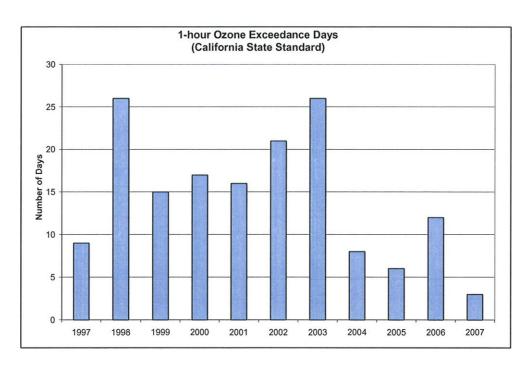

Under the 1997 standard, in effect through the end of 2007, "Attainment" would be achieved if the three-year average were less than, or equal to, 84 parts per billion (ppb), or 0.084 parts per million (ppm). In 2008, a new National 8-Hour Ozone Attainment standard went into effect: a three year average of 75 ppb (0.075 ppm). Data and attainment status for 2008 is expected to become available in 2009.

The California Clean Air Act has a different calculation method for its 8-hr oxidant [ozone] standard design value, and an attainment standard that is lower (0.070 ppm). The ozone improvement trend under the state Clean Air Act 8-hour ozone standard parallels the trend for the national 8-hour standard.

Correspondingly, the number of days per year in which the National 8-hour Ozone Standard has been exceeded have also decreased since the end of 2002:

In 1997, the Federal Clean Air Act repealed the former National 1-hour Ozone standard. However, the California Clean Air Act retains this air pollution parameter. The days per year in which the State of California 1-hour ozone standard has been exceeded have also shown a generally decreasing trend in the time since the 2025 Fresno General Plan MEIR was certified:

The current ozone attainment plan for the San Joaquin Valley Air Basin, in place when the MEIR for the 2025 Fresno General Plan was certified, is linked to a federal designation of "Serious Nonattainment." While ozone/oxidant air quality conditions are showing a trend toward

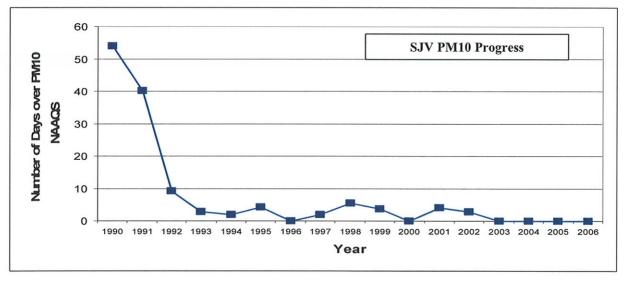

Page 13

improvement, the rate of progress toward full attainment is not sufficient to reach the national ambient air quality standards by the target date established by the attainment plan. Mobile sources (vehicle engines) are the primary source for ozone precursors, and the regulation of mobile sources occurs at the national and state levels and is beyond the direct regulatory reach of the regional air pollution control agency. As noted in the 2025 Fresno General Plan MEIR and reflected in the Statement of Overriding Considerations made when the MEIR was certified, potentially significant and unavoidable adverse air quality impacts are inherent in population growth and construction in the City of Fresno, given the Valley's climatology and the limitations on regulatory control of air pollutant precursors.

In 2004, the San Joaquin Valley Air Pollution Control District, in conjunction with the California Air Resources Board, approved a re-designation for the San Joaquin Valley Air Basin to "Extreme Nonattainment" status for ozone, approving a successor air quality attainment plan that projects San Joaquin Valley attainment of the national 8-hour ozone standard by year 2023. This designation and its accompanying attainment plan were submitted to the U.S. Environmental Protection Agency (USEPA) in November of 2004. To date, no formal action has been taken by USEPA to date on the proposed designation or the attainment plan; the Valley remains in "Severe Non- attainment" as of this writing.

The change from "Severe" to "Extreme" ozone Nonattainment would represent an extension of the deadline for attainment, but since the regional air basin would not have achieved attainment by the original deadline, this does not materially affect environmental conditions for the City of Fresno as they were analyzed in the MEIR for the 2025 Fresno General Plan. The proposed revised ozone attainment plan includes not only all the measures in the preceding ozone attainment plan, but additional measures for regulating a wider range of activities to attain ambient air quality standards.

The Valley's progress toward attaining national and state standards for PM-10 (particulate matter less than 10 microns in diameter) has been greater since certification of the MEIR:

As the preceding chart reveals, levels of PM-10 air pollution have decreased since 2002. When the MEIR was certified, the San Joaquin Valley Air Basin was designated in "Serious Nonattainment" for national standards. As of 2007, the number of days where standards were exceeded has decreased to the extent that the Valley has been deemed to be in Attainment. Under Federal Clean Air Act Section 107(d)(3), PM-10 attainment plans and associated rules

Page 14

and regulations remain in place to maintain this level of air quality. New and expanded regulations proposed to combat "Extreme" ozone pollution and PM-2.5 (discussed below) would be expected to provide even more improvement in PM-10 pollution situation.

The 2025 Fresno General Plan provided policy direction in support of "indirect source review" as a method for controlling mobile source pollution. Although vehicle engines and fuels are outside the purview of local and regional jurisdictions in California, approaching mobile source pollution indirectly, through regulation and mitigation of land uses which generate traffic, is an alternative approach.

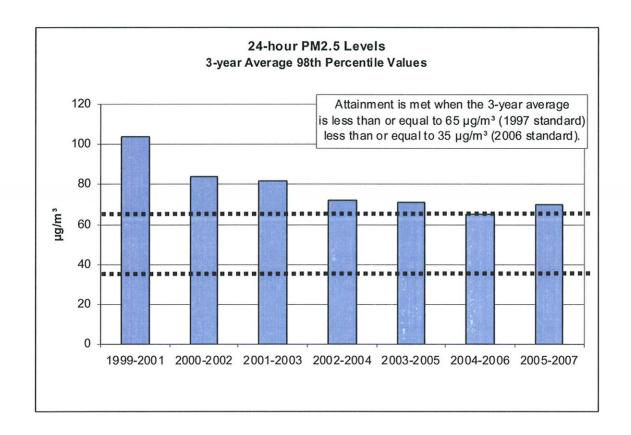

In March of 2006, the San Joaquin Valley Air Pollution Control District adopted Rule 9510, its Indirect Source Review Rule. Full implementation of this Rule has been delayed due to litigation (mitigation fees are being collected and retained in holding accounts), but projects are already being evaluated under Rule 9510 and are implementing many aspects of the Rule, such as clean air design (pedestrian and bike facilities; proximal siting of residential and commercial land uses; low-pollution construction equipment; dust control measures; cleaner-burning combustion appliances, etc.).

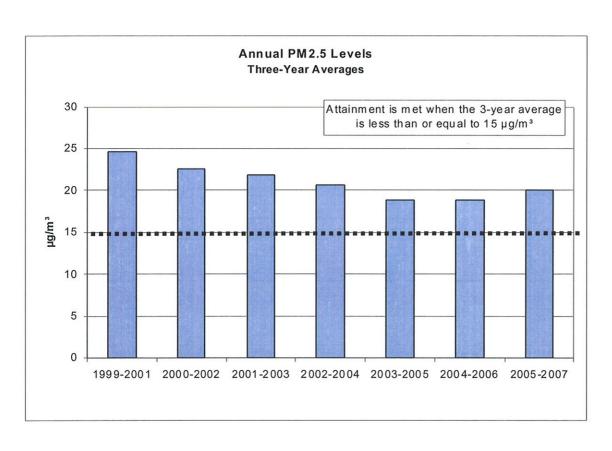

It is anticipated that full implementation (release of mitigation impact fees for various clean air projects throughout the San Joaquin Valley) and subsequent augmentation of the Indirect Source Review Rule will accelerate progress toward attainment of federal and state ozone standards, and will be an important component of the attainment plan for PM-2.5 (very fine particulate matter) and for greenhouse gas reductions to combat global climate change.

PM-2.5 is a newly-designated category of air pollutant, the component of PM-10 comprised of particles 2.5 microns in diameter or smaller. The 1997 Clean Air Act Amendments directed that this pollutant be brought under regulatory control, but federal and state standards/designations had not been finalized when the 2025 Fresno General Plan MEIR was drafted and certified. In the intervening time, the San Joaquin Valley Air Basin has been classified as being in "Nonattainment" for the 1997 federal PM-2.5 standard and for the State PM-2.5 standard.

An attainment demonstration plan for the federal 1997 PM-2.5 standard has been adopted by the SJVAPCD and approved by the California Air Resources Board, and forwarded to the EPA for approval (status as of mid-2008). The attainment plan would achieve compliance with the 1997 federal Clean Air Act PM-2.5 standard by year 2014, in conjunction with California Air Resources Board (and US EPA) action to improve diesel engine emissions. The San Joaquin Valley Air Basin has not yet been classified under the more stringent revised federal 2006 PM-2.5 standard; this classification is expected by 2009.

As with ozone and PM-10 pollution, levels of PM-2.5 have already been reduced by already-existing air quality improvement planning policies, mitigation measures, and regulations. The following charts depict historic PM-2.5 monitoring data for the regional air basin. Once the expected SJVAPCD attainment plan is implemented measures specific to PM-2.5 control, the rate of progress toward attainment of federal and state PM-2.5 standards will accelerate.

Page 16

When the 2025 Fresno General Plan and its MEIR were approved in late 2002, the planning and environmental documents did not directly or separately analyze potential global warming and climate change impacts. However, the general policy direction for consideration of air quality parameters in development project evaluations and for reducing those air pollutants which are already under regulation would operate to control these potential adverse impacts.

"Global warming" is the term coined to describe a widespread climate change characterized by a rising trend in the Earth's ambient average temperatures with concomitant disturbances in weather patterns and resulting alteration of oceanic and terrestrial environs and biota. When sunlight strikes the Earth's surface, some of it is reflected back into space as infrared radiation. When the net amount of solar energy reaching Earth's surface is about the same as the amount of energy radiated back into space, the average ambient temperature of the Earth's surface would remain more or less constant. Greenhouse gases potentially disturb this equilibrium by absorbing and retaining infrared energy, trapping heat in the atmosphere—the "greenhouse gas effect."

The predominant current opinion within the scientific community is that global warming is occurring, and that it is being caused and/or accelerated via generation of excess "greenhouse gases" [GHGs], that natural carbon cycle processes (such as photosynthesis) are unable to absorb sufficient quantities of GHG and cannot keep the level of these gases or their warming effect under control. It is believed that a combination of factors related to human activities, such as deforestation and an increased emission of GHG into the atmosphere from combustion and chemical emissions, is a primary cause of global climate change.

The predominant types of anthropogenic greenhouse gases (those caused by human activity), are described as follows. It should be noted that the starred GHGs are regulated by existing air quality policies and rules pursuant to their roles in ozone and particulate matter formation and/or as potential toxic air contaminants.

- carbon dioxide (CO₂), largely generated by combustion activities such as coal and wood burning and fossil fuel use in vehicles but also a byproduct of respiration and volcanic activity;
- *methane (CH₄), known commonly as "natural gas," is present in geologic deposits and is also evolved by anaerobic decay processes and animal digestion. On a ton-for-ton basis, CH₄ exerts about 20 times the greenhouse gas effect of CO₂;
- *nitrous oxide (N₂O), produced in large part by soil microbes and enhanced through application of fertilizers. N₂O is also a byproduct of fossil fuel burning: atmospheric nitrogen, an inert gas that makes up a large proportion of the atmosphere, is oxidized when air is exposed to high-temperature combustion. N₂O is used in some industrial processes, as a fuel for rocket and racing engines, as a propellant, and as an anesthetic. N₂O is one component of "oxides of nitrogen" (NOX), long recognized as precursors of smog-causing atmospheric oxidants.
- *chlorofluorocarbons (CFCs), synthetic chemicals developed in the late 1920s for use as improved refrigerants (e.g., "Freon™"). It was recognized over two decades ago that this class of chemicals exerted powerful and persistent greenhouse gas effects. In 1987, the Montreal Protocol halted production of CFCs.
- *hydrofluorocarbons (HFCs), another class of synthetic refrigerants developed to replace CFCs;

- *perfluorocarbons (PFCs), used in aluminum and semiconductor manufacturing, have an
  extremely stable molecular structure, with biological half-lives tens of thousands of years,
  leading to ongoing atmospheric accumulation of these GHGs.
- *sulfur hexafluoride (SF₆) is used for insulation in electric equipment, semiconductor manufacturing, magnesium refining and as a tracer gas for leak detection. Of any gas evaluated, SF₆ exerts the most powerful greenhouse gas effect, almost 24,000 times as powerful as that of CO₂ on a ton-for-ton basis.
- water vapor, the most predominant GHG, and a natural occurrence: approximately 85% of the water vapor in the atmosphere is created by evaporation from the oceans.

In an effort to address the perceived causes of global warming by reducing the amount of anthropogenic greenhouse gases generated in California, the state enacted the Global Warming Solutions Act of 2006 (Codified as Health & Safety Code Section 38501 *et seq.*). Key provisions include the following:

- Δ Codification of the state's goal by requiring that California's GHG emissions be reduced to 1990 "baseline" levels by 2020.
- Δ Set deadlines for establishing an enforcement mechanism to reduce GHG emissions:
  - By June 30, 2007, the California Air Resources Board ("CARB") was required to publish "discrete early action" GHG emission reduction measures. Discrete early actions are regulations to reduce greenhouse gas emissions to be adopted by the CARB and enforceable by January 1, 2010;
  - By January 1, 2008, CARB was required to identify what the state's GHG emissions were in 1990 (set the "baseline") and approve a statewide emissions limit for the year 2020 that is equivalent to 1990 levels. (These statewide baseline emissions have not yet been allocated to regions, counties, or smaller political jurisdictions.) By this same date, CARB was required to adopt regulations to require the reporting and verification of statewide greenhouse gas emissions.
  - By January 1, 2011, CARB must adopt emission limits and emission reduction measures to take effect by January 1, 2012.

As support for this legislation, the Act contains factual statements regarding the potential significant impacts on California's physical environment that could be caused by global warming. These include, an increase in the intensity and duration of heat waves, the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snow pack, a rise in sea levels resulting in the displacement of thousands of coastal businesses and residences, damage to marine ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems.

On August 24, 2007, California also enacted legislation (Public Resources Code §§ 21083.05 and 21097) requiring the state Resources Agency to adopt guidelines for addressing climate change in environmental analysis pursuant to the California Environmental Quality Act. By July 1, 2009, the Governor's Office of Planning and Research (OPR) is required to prepare guidelines for the mitigation of greenhouse gas emissions, and transmit those draft regulations to the Resources Agency. The Resources Agency must then certify and adopt the guidelines by January 1, 2010.

Page 18

The recently-released update of the Urbemis computer model (used by the City of Fresno Planning and Development Department for environmental assessments, pursuant to a specific MEIR mitigation measure) does provide data on the amounts of CO₂ and oxides of nitrogen (NOX) potentially generated by development projects. However, at this point in time, neither CARB nor the SJVAPCD has determined what the 1997 baseline or current "inventory" of GHGs is for the entire state nor for any region or jurisdiction within the state. No agency has adopted GHG emission limits and emission reduction measures, and because CEQA guidelines have not been established for the evaluation and mitigation of greenhouse gas emissions (there is an absence of regulatory guidance). Therefore, the City is unable to productively interpret the results of the Urbemis model with regard to GHGs, and there is currently no way to determine the significance of a project's potential impact upon global warming.

The 2025 Fresno General Plan provides an integrated combination of residential, commercial, industrial, and public facility uses allowing for proximate location of living, work, educational, recreational, and shopping activities within Fresno metropolitan area. This combination of uses has been identified as a potential mitigation measure to address global warming impacts in a document published by the California Attorney General's Office entitled, *The California Environmental Quality Act Mitigation of Global Warming Impacts* (updated January 7, 2008). Specifically, this document describes this mitigation measure as follows, "Incorporate mixeduse, infill and higher density development to reduce vehicle trips, promote alternatives to individual vehicle travel, and promote efficient delivery of services and goods"—echoing objectives and policies of the 2025 Fresno General Plan adopted in late 2002.

The General Plan contains a mix of land uses would be expected to generate fewer vehicle miles traveled per capita, leading to reduced emissions of greenhouse gases from engine emissions. It provides for overall denser development with high-intensity enclaves, associated with increased public transit use. The plan fosters mixed use and infill development (being implemented by mixed-use zoning ordinances added to the Fresno Municipal Code, as directed by 2025 Fresno General Plan) policies. The urban form element distributes neighborhood-level and larger commercial development, public facilities such as schools, and recreational sites throughout the metropolitan area, reducing vehicle trips.

Any manufacturing activities that would generate  $SF_6$ , HFCs, or PFCs would be subject to subsequent environmental review at the project-specific level, as would any uses which would generate methane on site. The City of Fresno has adopted an ordinance prohibiting installation of any woodburning fireplaces or woodburning appliances in new homes, which would reduce  $CO_2$  and  $N_2O$  from wood combustion.

Through updates in the California Building Code and statewide regulation of appliance standards, City development projects conform to state-of-the art energy-efficient building, lighting, and appliance standards as advocated in the California Environmental Protection Agency's publication Climate Action Team / Proposed Early Actions to Mitigate Climate Change in California (April 2007) and in CARB's Proposed Early Actions to Mitigate Climate Change in California (April 2007). The City has further incentivized "green" building projects by providing subsidies for solar photovoltaic equipment for single-family residential construction, by reducing development standards (including reductions in required parking spaces, which further reduces air pollutant and GHG emissions), and by improving its landscape and shading standards (a topic included in the Design Guidelines adopted with the 2025 Fresno General Plan).

Updated engine and tire efficiency standards would apply to residents' vehicles, as well as the statewide initiatives applicable to air conditioning and refrigeration equipment, regional

Page 19

transportation improvements, power generation and use of solar energy, water supply and water conservation, landfill methane capture, changes in cement manufacturing processes, manure management (methane digester protocols), recycling program enhancements, and "carbon capture" (also known as "carbon sequestration," technologies for capturing and converting CO₂, removing it from the atmosphere).

Due to the lack of data or regulatory guidance that would indicate the 2025 Fresno General Plan had a significant adverse impact upon global climate change, the relatively small size of the Fresno Metropolitan Area in conjunction with the worldwide scope of GHG emissions, and the emphasis in the 2025 Fresno General Plan upon integrated urban design and air pollution control measures, it could not be concluded in 2002 nor at present that the 2025 Fresno General Plan would have a significant adverse impact on global climate change.

As to potential impacts of global warming upon the 2025 Fresno General Plan: the city is located in the Central Valley, in an urbanized area on flat terrain distant from the Pacific coast and from rivers and streams. It is outside of identified flood prone areas. Based on its location we conclude that Fresno is not likely to be significantly affected by the potential impacts of global climate change such as increased sea level and river/stream channel flooding; nor is it subject to wildfire hazards. While Fresno does contain areas with natural habitat (the San Joaquin Bluffs and Riverbottom), a change in these areas' biota induced by global warming would not leave them bereft of all habitat value—it would simply mean a change in the species which would be encountered in these areas. The 2025 Fresno General Plan preserves this habitat open space area for multiple objectives (protection from soil instability and flood inundation; conservation of designated high-quality mineral resources), so any natural resource species changes in those areas would not constitute a significant adverse impact to the city or a loss of resource area.

Fresno has historically had high ambient summer temperatures and an historic heat mortality level that is among the highest in the state (5 heat-related deaths annually per 100,000 population). Due to the prevalence of air conditioning in dwellings and commercial buildings, an increase in extreme heat days from global warming is not expected by the California Air Resources Board Research Division to significantly increase heat-related deaths in Fresno, as opposed to possible effects in cooler portions of the state such as Sacramento or Los Angeles areas (reference: *Projections of Public Health Impacts of Climate Change in California: Scenario Analysis*, by Dr. Deborah Dreschler, Air Resources Board, April 9, 2008). Increased summertime temperatures which may be caused by global warming will be mitigated by the City's landscaping standards to provide shade trees, by statewide energy efficiency standards which insulate dwellings from heat and cold, and by urban design standards which require eastwest orientation of streets and buildings to facilitate solar gain. Fresno has a heat emergency response plan and provides cooling centers and free transportation to persons who do not have access to air conditioning.

Secondary health effects of global warming could include increases in respiratory and cardiac illnesses attributable to poor air quality. The San Joaquin Valley Air Pollution Control District provides daily advisories and warnings in times of high ozone levels to help senior citizens and other sensitive populations avoid exposure. The SJVAPCD has committed to attainment of fine particulate matter (PM2.5) standards by Year 2014 and to attainment of oxidant/ozone standards by Year 2023, and would adopt additional Rules and emission controls as necessary to decrease emissions inventories by those target dates. There is insufficient information to indicate that global climate change would prevent attainment of air quality parameters affecting health.

Pursuant to 2025 Fresno General Plan policy and MEIR mitigation measures, the City's Department of Public Utilities and Fire Department are required to affirm that adequate water service can be provided to all development projects for potable and fire suppression uses. The City derives much of its water supply from groundwater, using its surface water entitlements from the Kings and San Joaquin Rivers primarily to recharge the aquifer. A high percentage of Fresno's annual precipitation is captured and percolated in ponding basins operated by Fresno Metropolitan Flood Control District. If global climate change leads to a longer rainy season and/or more storm events throughout the year, groundwater supplies could be improved by additional percolation.

The City of Fresno currently treats and distributes only some 20% of its 150,000 acre-foot/year (AFY) surface water entitlement for the municipal water system, directing another 50,000 to 70.000 AFY to recharge activities via ponding basins. Presently, the City is unable to recharge the full balance of its annual entitlement in average and wet years, and releases any unused surface water supplies to area irrigation districts for agricultural use in the metropolitan area, (which further augments groundwater recharge through percolation of irrigated water).

Future surface water plant construction projects envisioned by the 2025 Fresno General Plan would account for less than 120,000 acre-feet per year of the surface supply. The General Plan direction for future Metropolitan Water Resource Management Plans includes exploring the use of recycled treated wastewater for non-potable uses such as landscape irrigation, which would further effectively extending the City's water supply..

If the global climate change were to cause a serious and persistent decrease in Sierra snowpack, some of Fresno's water supply could be affected. However, historic records show that the very long-term prevailing climatic pattern for Central California has included droughts of long (often, multi-year) duration, interspersed with years of excess precipitation. Decades before global climate change was considered as a threat to California's water system, state and local agencies recognized a need to augment water storage capacity for excess precipitation occurring in wet years, to carry the state through the intervening dry years.

The potential for episodic and long-term drought is considered in the city's Metropolitan Water Resource Plan and in its the Urban Water Management Plan Drought Contingency component, to accommodate reductions in available water supplies. In times of extended severe regional or statewide drought, a reprioritization of water deliveries and reallocation for critical urban supplies vs. agricultural use is possible, but it is too speculative at this time to determine what the statewide reprioritization response elements would be (the various responses of statewide and regional water agencies to these situations are not fully formulated and cannot be predicted with certainty). Because the true long term consequences of climate change on California's and Fresno's water system cannot be predicted, and, it is too speculative at this time to conclude that there could be a significant adverse impact on water supply for the 2025 Fresno General Plan due to global climate change.

As noted above, it is theorized that global warming could lead to more energy in the atmosphere and to increased intensity or frequency of storm events. Fresno's long-term weather pattern is that rainfall occurs during episodic and fairly high-intensity events. The Fresno Metropolitan Flood Control District (FMFCD) drainage and flood control Master Plan, which sets policies for drainage infrastructure and grading in the entire Fresno-Clovis area, is already predicated on this type of weather pattern. FMFCD sizes its facilities (which development potentiated by the 2025 Fresno General Plan will help to complete) for "two-year storm events," storms of an

Page 21

intensity expected in approximately 50 percent of average years; however, the urban drainage system design has additional capacity built into the street system so that excess runoff from more intense precipitation events is directed to the street system. The City's Flood Plan Ordinance and grading standards require that finished floor heights be above the crowns of streets and above any elevated ditchbanks of irrigation canals. FMFCD project conditions also preserve "breakover" historic surface drainage routes for runoff from major storms. Ultimately, drain inlets and FMFCD basin dewatering pumps direct severe storm runoff into the network of Fresno Irrigation District canals and pipelines still extant in the metropolitan area, with outfalls beyond the western edge of the metropolitan area.

Scientific information, analytical tools, and standards for environmental significance of global warming and green house gases were not available to the Planning and Development Department in 2002 when the 2025 Fresno General Plan and its MEIR were formulated and approved—and at this point, there is still insufficient data available to draw any conclusions as to the potential impacts, or significance of impacts, related to global climate change for the 2025 Fresno General Plan. Similarly, there is insufficient information to conclude that global warming may have a potentially significant adverse impact upon the 2025 Fresno General Plan. In a situation when it would be highly speculative to estimate impacts or to make conclusions as to the degree of adversity and significance of those impacts, the California Environmental Quality Act allows agencies to terminate the analysis. In that regard, there is no material change in status from the degree of environmental review on this topic contained in the 2025 Fresno General Plan MEIR.
